ACKNOWLEDGMENTS

Working on the Ph.D. has been a wonderful and often overwhelming experience. It is hard to say whether it has been grappling with the topic itself which has been the real learning experience with how to write papers and proposals, work in a group, stay up until the birds start singing and stay focus. In any case, I am indebted to many people for making the time working on my Ph.D. an unforgettable experience.

First of all, I would like to express my gratitude to my supervisor and guide, Dr. Jaydeep V. Sali, whose expertise, understanding, and patience, added considerably to my doctoral experience. He provided me with direction, psychological support and became more of a mentor and friend, than a professor. I appreciate his vast knowledge and skill in many areas (vision, aging, ethics, interaction with participants) and his assistance in writing reports and this thesis, which have on occasion made me "GREEN" with envy.
