Acknowledgements

This doctoral thesis would not have been possible without the guidance and the help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study.

Foremost, I would like to express my sincere gratitude to my guide Dr. N N Barman for the continuous support of my Ph.D study and research, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisors and mentors for my Ph.D study. The good advice, support and friendship of my second supervisor, Prof. Manab Deka, has been invaluable on completion of my piece of work for which I am extremely grateful.

Besides my supervisors, I would like to thank the CMD and the Authority of N.F.Railway, and the faculty of Medicine, Gauhati University as such for their kind permission and insightful advices regarding undertaking and completion of my PhD research work.

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me, to only some of whom it is possible to give particular mention here. Above all, I would like to thank all the doctors and nurses and laboratory staff of Central hospital, NF Railway and my family for the personal support and great patience at all times. I would like to acknowledge the academic and technical support of the Gauhati University and its staff, particularly the research scholars and friends from the Bio-medical science laboratory under the aegis of Department of Biotechnology, Gauhati University. I am most grateful to Moumita Bose, Md Ghaznavi Idris and Dr. Subhash Medhi for providing me the technical and academic support to complete my proposed objectives precisely, accurately and timely.

I thank the Dean of faculty of Medicine and Principal, GMCH Dr. Kabul Saikia for allowing me to do the research work and Dr. P.K.Bhattacharjee, Prof. & HOD, Medicine for time to time inspiration, encouragement and logistic support in completing the thesis.

I also thank the Department of Medicine, Gauhati Medical College and Department of Biotechnology, Gauhati University for their support and assistance since the start of my work.

I am most grateful to the other Medical practitioners and gastroenterologist of other state centres for kindly referring the patients to our centre because of which evaluation of cases was not restricted to the state of Assam but from the entire Northeast. My special thanks to Dr. R S Thangkhiew of Meghalaya, Dr.
Talar Moto of Arunachal Pradesh, Dr. B.D.Goswami & Dr. Sangeet Dutta of GMCH for contributing their patients blood samples and other data’s. I would like to thank Dr. Sujoy Bose for his friendship and academic support. I would also like to thank my colleagues and friends and patients in the Department of Medicinal and Gastroenterogy unit of Central hospital, NF Railway for their support, encouragement and everything they have contributed for the successful completion of this study. For any errors or inadequacies that may remain in this work, of course, the responsibility is entirely my own.

I am delighted to acknowledge and appreciated the logistic support and inspiration that I received from Dr. Atindra Adhikari, Principal AMCH, and Dr. B.P. Chakravarty, Principal Barpeta Medical College.

Last but not the least I wish to place on record the help rendered by Ms. Swapna Sarma for her secretarial assistance in maintaining the data’s of all the cases enrolled for the study.

Dr Anjan kumar Saikia
