ACKNOWLEDGEMENT

I am in short of words to thank Dr.A. SANTHAKUMARAN, Reader and Head, Department of Statistics, Salem Sowdeswari College, Salem-10, my guide for his timely instruction, constructive suggestion, eminent guidance and input throughout this thesis. Despite of his hectic schedule, he took ultimate care on me by devoting his precious times. His words of appreciation boosted my confidence and helped me to tide over the hurdles, which I came across while translation of the project from concept to reality. To be frank I am bereft of words to express my ocean of gratitude, I thank him from the bottom of my heart.

My deep sense of gratitude and thanks to ‘The Principal, Salem Sowdeswari College, Salem-10’, for having allowed me to do this Ph.D., thesis.

I would be failing in my duty if I do not place on record the help and cooperation provided by my beloved wife, P.Manonmani and my sons B.Surendiran and B.Karthik for their valuable knowledge shared with me.
I express my deep sense of gratitude and indebtedness to Prof. Dr. M. Karunanithi, Chairman and Secretary of Vivekanandha Educational Institutions, who has provided me the opportunity to fulfill my most cherished desire to reach my destiny.

I would like to extend ‘Special Thanks’ to Mr. S. Meganathan, Chief Executive and to Dr. A. Somu, Director, Vivekanandha Institute of Information and Management studies for their valuable ideas towards my work.

Above all I thank and praise almighty for showering upon me his supernatural grace and my parent’s mercies in abundance that has played the greatest role in achieving this success.
