Acknowledgement.

It is with immense gratitude that I acknowledge the support and help of my Guide and Supervisor Dr. Bharat H. Mimrot, who guided me throughout the journey of my research. I cannot find words to express my gratitude Dr. Mimrot who had given answers for all my queries timely and untimely.

Right from the beginning of my career 'Intelligence' term attracted me. It was my professor, Ex Vice chancellor of Mumbai University Dr. Bengali. Who really enlightened me in the field of Psychology and testing. Over the years the scope of intelligence widened, and the new term ‘Emotional Intelligence’ has emerged, I was always curious to understand the facial expressions and Locus of control concepts. Combining all three for research purpose was Dr. Mimrot’s idea.

My sincere thanks to Mrs. Rakhi Kelskar (Co-coordinator JJTU), Mrs. Shaila Shikhere (Principal LFHS Polytechnic.), Ms. Sana (President of Students Association. Chinai college. Andheri. Mumbai) Ms. Dhwani Doshi (Director Creative Chase) for their immense support for my research data collection. It was because of them such a humongous task became easy and achievable. I would like to show gratitude to all my classmates Sonia, Shilpa, Shaila, Anita and Jayshree, because of them PhD was fun! Once again I understood the meaning of learning, researching, travelling and enjoyment in my life.

I would like to share the credit of my work with my husband Amit who was my constant source of inspiration. Who supported me in every venture of my life. This thesis would have remained a dream, if Amit would not have encouraged me. His flexibility, tolerance and jovial nature made my task sheer joy rather than pure work. I would like to thank both my children Tanvi and Raj. Whose vital time may have been taken away in this due course of the work. I thank my kids for letting me realize my dream. I would like to thank all my sisters Nina, Kamini and Trupti without them world would not have been same for me. Lastly I owe my deepest gratitude to my mother Aruna Jhaveri, who taught me value of learning and humanity. It was she, who I give credit for bringing me to the world of Psychology.
