ACKNOWLEDGEMENT

The author is beholden to her research supervisor Dr. S. Moorthy Babu, Assistant Professor, Crystal Growth Centre, for suggesting the problem in research, his inspiring guidance, illimitable encouragement, passionate support, soaring scientific proficiency, profuse personal interest and scholarly advice to carry out the present investigation.

The author expresses her deep sense of gratitude with profound indebtedness to Prof. J. Kumar, Director, and CGC for his suggestions, constant encouragement. My thanks are due to Prof. P. R. Subramanian, Former HOD, Nuclear Physics Department, University of Madras, for introducing me to this field. I wish to thank Dr. P. Ramasamy, former CSIR Emeritus Scientist, Prof. R. Dhanasekaran, Dr. S. Narayana Kalkura, Dr. R. Jayavel, and Dr. K. Baskar CGC, AU for their kind support.

The author is extremely thankful for the help rendered by the doctoral committee members. The author also thanks Prof. P.K. Palanisamy, A.U. and Dr. S. Gunasekaran, Pachaiyappa’s college for extending help in the characterization studies.

The author is thankful to Dr. M. Haris, A. Senthil Kumaran, Dr. P. Veeramani, K. Senthil Kumar, P. Kumar, P. Samuel, J. Ramkumar and D. Thangaraju, research scholars of CGC for their kind support.

The author places on record her profound gratitude to her husband Mr. G. Chandrasekar, son Master C. Srihari, and Parents, whose constant encouragement was the guiding spirit behind this work.

(S.K. GEETHA)
