

CONTENTS

Title	Page No.
Introduction	1-6
Review of literature	7-42
Materials and methods	43-66
Results	
1. Detached rice leaf assay for leaf blast infection	67-74
2. Testing rice varieties for reaction to leaf blast pathogen	75-82
3. Testing rice varieties for reaction to sheath blight pathogen	83-90
4. Testing rice varieties for reaction to bacterial leaf blight pathogen	91-98
5. Testing rice varieties for reaction to rice tungro virus pathogen	99-106
6. Morphological traits and grain yield performance of rice varieties	107-138
7. Stability or changes in reaction to pathogens and grain yields and diversity analysis with DNA fingerprints of varieties	139-168
Discussion	169-192
Summary	193-202
Literature cited	203-228

Abbreviations/Acronyms

AICRIP = All-India Coordinated Rice Improvement Project

METs = Multi-Environmental Tests

IET No. = Initial evaluation Number

IRE = irrigated early maturity;

IRME = irrigated mid-early maturity;

IRM = irrigated medium maturity;

RUP = rainfed upland;

RSL = rainfed shallow lowland;

SCR = scented rice;

SDW = semi-deep water (30-50 cm water depth);

DW = deep water (>50-100 cm water depth);

HRIR/HRUR = hill rice irrigated/upland;

50% flow = days to 50% flowering;

SB = short bold;

LB = long bold;

MS = medium slender;

LS= long slender;

SCR = scented rice

CV = Coefficient of variation

g = gram(s)

t = tonnes

ha = hectare

m ha = million hectares

m t = million tonnes

ml = milliliter(s)

DRR = Directorate of Rice Research

Bl = Leaf blast; BLB = Bacterial leaf blight; ShBl = Sheath blight; RTV = Rice tungro virus
