

Acknowledgement

At the juncture of completion of my doctoral research, I stand very confident to step in to the world with strength and vigor. This confidence has been installed in me due to the pleasant encounters with some special people, which made me rich in experience during the Ph.D. tenure. I am thankful to all of them who have directly or indirectly contributed towards shaping this doctoral dissertation. At the outset, I would like to express my sincere gratitude to my research supervisor, Dr. Shikha Nema, for her continuous support, invaluable guidance, scholarly inputs and constant encouragement throughout my doctoral research endeavor. Her approach to any kind of problem not only enriches confidence in me, but also enables me to think and act independently. I really consider myself fortunate to have such an ideal source of inspiration for acquiring knowledge.

I shall always remain grateful to Shri. Sameer Somaiya, Chairperson, Somaiya Trust, for providing an opportunity for higher studies. I am also thankful to Dr. Shubha Pandit, Principal, K. J. Somaiya College of Engineering, Vidyavihar, Mumbai for granting me study leave for pursuing my Ph.D. I express my deep regards to Dr. Sanjay Pawar, Principal, UMIT, SNDDT Womens University, Santacruz, for providing all the necessary research facilities in the college during the pursuit of my research work. I am extremely grateful to the administrative staff and non-teaching staff of Usha Mittal Institute of Technology, Academic Section and Pariksha Bhavan of SNDDT Women's University for providing all administrative help in my hour of need.

I express my heartfelt gratitude to Dr. Amit Deshmukh, Professor and Head of the Department of Electronics and Telecommunication Engineering, D. J. Sanghvi College of Engineering, for his valuable suggestions during my Ph.D. tenure. His critical remarks at various stages of my research as an external examiner kept me motivated and fuelled. I would also like to thank the Dr. S. S. Thakur for the useful discussions, valuable suggestions and encouragement throughout the course of my Ph.D. His supporting hands were always there whenever I needed it the most.

I would like to thank HOD(EXTC), my friends and colleagues from K. J. Somaiya College of Engineering for their direct or indirect cooperation and encouragement throughout this study. I take the opportunity to thank each and every staff member of EXTC department, K. J. Somaiya College of Engineering, Mumbai who have con-

tributed in any form towards the completion of this task. It gives me immense pleasure to give my sincere love and affection towards my parents (pappa and mummy), my in-laws (aai and baba) and my family members(specially tai, bhai, didi, shilpa) and all my friends. It was their backing that led me into completion of this work. Their blessings, inspirations and timely encouragement helped me to complete this research. I want to thank my husband, Dr. Jitendra Satam, for his unconditional support, love, encouragement which helped me to get through this research period in positive way and achieve my goal. His passion towards science and education always encouraged me to achieve greater heights. I express my heartiest thanks to my daughter Ovi, for sharing her smile to provide unending inspiration during my research. I would like to thank everyone who have directly or indirectly helped me in successful completion of my research. Finally, I would like to thank almighty 'God', whose blessings gave me strength and encouragement during completion of this research work.

-Vandana Jitendra Satam
