Acknowledgement

First and foremost I would like to thank God. You have given me the power to believe in myself and pursue my dreams. I could never have done this without the faith in you, the Almighty.

Though the following dissertation is an individual work, I could never have reached the heights or explored the depths without the help, support, guidance and efforts of a lot of people. Firstly, I would like to thank my mentor Prof. V.K. Jain for instilling in me the qualities of being a good scientist and chemist. His infectious enthusiasm and unlimited zeal have been major driving forces through my career. There are no proper words to convey my deep gratitude and respect for my research advisor. He has inspired me to become an independent researcher and helped me realize the power of critical reasoning. He also demonstrated what a brilliant and hard-working scientist can accomplish.

This thesis is the beginning rather than end of my long eventful journey in obtaining my degree in international relations and exploring more what I have been imbied with. I have not travelled in a vacuum in this journey. There are some people who made this journey easier with words of encouragement and more intellectually satisfying by offering different places to look to explicit my ideas and expand my theories. It is a pleasant aspect that I have now the opportunity to express my gesture of thankfulness for all of them.

I am indebted to my Head of Department Prof. (Miss) Nisha K. Shah, She has provided, with kindness, her insight and suggestions, which are precious to me.

I am also very grateful to Prof. Y.K. Agrawal for his scientific advice and knowledge and many insightful discussions and suggestions.

Special thanks must go to Prof. (Mrs.) S. K. Menon who taught me the delight of studying chemistry and encouraged me to pursue my interests in research.

I would like to thank Mrs. Ripu Daman Jain who provided me with her invaluable advice and comments on both my research and my future research career plans. I also convey my earnest appreciation for her affection and concern showered on me.

My very special thanks to the my parents whom I owe everything I am today, my father Dinesh Bhatt and mother Meeta Bhatt who showed me the true worth of hard work who raised me with a passion of science and supported me in all my pursuits and because of their hunger desire and dedication towards education I have been successful in achieving my goals and accomplishing their dream and my aspirations.

I would like to thank my family, especially my Grandfather and Grandmother for always believing in me, for his continuous love and supports in my decisions without whom I could not have made it here.
I would like to thank my brother Dr. Vaibhav Bhatt, Priti bhabhi and sister Dhriti for all their love and support over the years, during this venture and for their enormous encouragement and faith in my ability to accomplish the degree program.

I am very much privileged to learn from my mama and mami (Vibhudh and Shobha Dixit), who consistently extended their expertise throughout my work and I owe a lot to them for this achievement.

I wish to express my heartfelt gratitude to Dimple for her love, encouragement and constant prayers. She always loved me and supported my every choice. I owe a loving thanks to my colleagues Dr. Hrishikesh Gupte, Disha Vyas and Bharat Makwana, for their endless encouragement, moral support and fruitful discussions. I will always keep my colleagues in hearty touch for creating joyful and fantastic environment in laboratory to work at any time.

I express my gratitude to my seniors Dr. Hiren Mandalia and Dr. Parin Kanaiya for their valuable suggestions and support.

My Labmates, Savan, Divya, Krunal, Manthan, Viren, Urvi and Anita all have extended their support in a very special way, and I gained a lot from them, through their personal and scholarly interactions, their suggestions at various points of my research programme.

I’ve also been fortunate to have a great group of friends. This includes Madhur, Milan, Arpan, Manan, Om, Pradip, Khushabu, Priti, Kinjal, Sulbha, Tina, and Dhvani. They not only been my mates for discussions of my research work, but also the confidants on whom I could rely for valuable suggestions and who could stand by me through thick and thin.

I also want to thank, Manish, Ravibabu, Rahul, Bhupesh, Promise, Alok, Pinkesh and Debdeep for their great technical support during my Ph.D period.

The administrative staffs and non teaching staff in the Chemistry Department, Gujarat University were memorable not only for their prompt support but also for their kind care.

I would like to thank CSMCRI; Bhavnagar, CDRI; Lucknow, GFSU; Gandhinagar and IISC; Bangalore for providing the spectral & elemental analysis data of my samples. I would like to make a special mention of UGC-BSR for providing me financial assistance to carry out this work.

For any errors or inadequacies that may remain in this work, of course, the responsibility is entirely my own.

Keyur D. Bhatt
