Acknowledgements

Some incidents in our lives are filled up with such an overwhelming moment that we really lose our expressions. And such is the feeling that I have today while making this sincere attempt of acknowledgement.

I owe my deep gratitude and respect to my supervisor Prof. Rakesh Kumar Seth, Department of Zoology, University of Delhi, Delhi for supervising me during my Ph. D. course. His deep concern for the students, wide and deep knowledge on the subject and always motivating personality chiseled me to improve my Ph. D. Work and inculcated in me the deep interest on my subject of choice.

I am extremely grateful to Prof. A.K. Singh, Head of the Department of Zoology, for the kind provision of the proper facilities and environment for executing research works.

I am particularly obliged to Dr. Ranjana Seth for the constant moral support rendered to me throughout the period of my study.

I am indebted to Institute of Nuclear Medicine and Allied Sciences (INMAS) Delhi for allowing me to use the gamma radiation facilities.

I am extending my sincere thanks to my senior colleague and mentors, Dr. Dev Kant Rao, Dr. Jeepinder Jeet Kaur, Dr. Tapan Kumar Barik, Sonal Chauhan and Manas Kumar Dhal, Dr. Bindiya Sachdev, Dr. Shubhankar Suman for their well-thought and work centric guidance. In their well thought and clear style, they never stopped giving me the really needed spirit to make challenges and courage to defeat them.

I especially express gratitude to my sweet friend Zubeda for giving me love, affection, immense patience, selfless support and encouragement.
It is with genuine pleasure that I am obliging the great helps of my colleagues, Soma, Shweta and juniors, Kavita and Subdas, Shobha, Manu, Shriyanka, Abha, Saurabh, Monika, Smitta, Sabzar, Sneh. I am greatly overwhelmed by the kind cooperation and motivation of other M.Phil. students of my batch. I would always remember them for all the considerable dialogues, seminars and stimulating discussions.

I also thank Laxman, Omprakash, Prem, Arnab for assisting me during my work in the laboratory.

Thanks also to my friends Dr. Kapinder, Tarkeshwar, Dr. Poja, Dr. Vandana, Sonika, Dr. Nisha, Dr. Nidhi, Dr. Neetu for always nudging me to complete my work on time.

I am extending my deepest regards to my parents without whose help and consideration I could not accomplish anything. In same way I appreciate the overwhelming love and support of my Family members.

Last but not the least, I thank Arun Thesis for formatting the manuscript in the decent form.

I am truly grateful for the many hands and hearts that have made this work possible. I love you all.

The present research was supported by International Atomic Energy Agency (IAEA) and UGC and their support of these organization are duly acknowledged.

Mahtab Zarin
