

TABLE OF CONTENTS

CHAPTER NO.	TITLE	PAGE NO.
	ABSTRACT	iii
	LIST OF TABLES	viii
	LIST OF FIGURES	x
1	INTRODUCTION	
1.1	General Introduction	1
1.2	Dimensions of nanomaterials	5
1.3	Properties and applications of nanocrystalline materials	9
1.3.1	Novel mechanical properties	10
1.3.2	Unique magnetic properties	11
1.3.3	Crystal-shape-dependent thermodynamic properties	11
1.3.4	Semiconductor quantum dots for optoelectronics	12
1.3.5	Quantum devices for nanoelectronics	13
1.3.6	Carbon fullerenes and nanotubes	14
1.3.7	Ordered self-assembly of nanocrystals	15
1.3.8	Photonic crystals for optically-active devices and circuits	16
1.3.9	Mesoporous materials for low-loss dielectrics and catalysis	17
1.4	Synthesis of nanocrystalline materials	18
1.5	Top-down processes	19
1.5.1	High-energy milling	19
1.5.2	Chemical-mechanical milling	21
1.5.3	Mechanochemical processing	22
1.5.4	Vapour phase processes	23
1.5.5	Laser ablation	23
1.5.6	Electro-explosion	24
1.5.7	Sputtering	25
1.5.8	Spark discharge generation	25
1.6	Bottom-up processes	25
1.6.1	Liquid phase	25
1.6.2	Sol-gel	26
1.6.3	Self-assembly	27

1.6.4	Chemical vapour deposition	28
1.6.5	Electrodeposition	28
1.6.6	Microwave assisted solution method	30
1.7	Experimental Techniques and Instrumentation	32
1.7.1	Powder X-ray Diffraction Technique	32
1.7.2	Scanning Electron Microscope (SEM)	35
1.7.3	Impedance Spectroscopy	36
1.7.4	Transmission Electron Microscope (TEM)	37
1.7.5	UV-Visible Absorption Spectroscopy	39
1.7.6	FT-IR spectroscopy	41
1.7.7	Thermal analysis-TGA/DTA	42
2	LITERATURE REVIEW	
2.1	Relevant literature survey	45
2.2	Aims and scope of the present work	55
3	SYNTHESIS, STRUCTURAL, MORPHOLOGICAL, OPTICAL, THERMAL AND ELECTRICAL CHARACTERIZATION OF POLYANILINE/MANGANESE DIOXIDE (PANI/MNO₂) NANOCOMPOSITES	
3.1	Introduction	59
3.2	Synthesis of MnO ₂ nanoparticles and PANI/ MnO ₂ nanocomposites in the present work	62
3.3	X-ray studies of pure MnO ₂ , PANI and PANI/ MnO ₂ nanocomposites	63
3.4	Scanning Electron Microscope (SEM) of as-prepared pure PANI, MnO ₂ and PANI/ MnO ₂ nanocomposites	73
3.5	High resolution Transmission Electron Microscopic (HRTEM) Studies of MnO ₂ and PANI/ MnO ₂ nanocomposites	79
3.6	FT-IR spectroscopic studies of PANI, MnO ₂ and PANI/ MnO ₂ nanocomposites	90
3.7	UV-visible spectroscopic studies of PANI, MnO ₂ and PANI/ MnO ₂ nanocomposites	100
3.8	TG/DTA studies	108
3.9	Electrical studies	111

3.9.1 Impedance spectral studies	112
3.9.2 Determination of AC conductivity	128
3.9.3 Dielectric analysis	138
3.9.4 Modulus analysis	147
3.10 Conclusion	155
4 SYNTHESIS, STRUCTURAL, MORPHOLOGICAL, OPTICAL, THERMAL AND ELECTRICAL CHARACTERIZATION OF POLYANILINE/TITANIUM DIOXIDE (PANI/TiO₂) NANOCOMPOSITES	
4.1. Introduction	157
4.2 Synthesis of TiO ₂ nanoparticles and PANI/TiO ₂ nanocomposites in the present work	161
4.3 X-ray studies of pure TiO ₂ and PANI/ TiO ₂ nanocomposites	162
4.4 Scanning Electron Microscope (SEM) of as-prepared pure TiO ₂ and PANI/ TiO ₂ nanocomposites.	170
4.5 High Resloution Transmission Electron Microscopic (HRTEM) studies of TiO ₂ nanoparticles and PANI/ TiO ₂ nanocomposites.	176
4.6 FT-IR spectroscopic studies of TiO ₂ and PANI/ TiO ₂ nanocomposites	193
4.7 UV-Visible spectroscopic studies of TiO ₂ and PANI/ TiO ₂ Nanocomposites	202
4.8 Electrical studies	207
4.8.1 Impedance spectral studies	207
4.8.2 AC conductivity measurements	214
4.8.3 Dielectric analysis	224
4.8.4 Modulus analysis	233
4.9 Conclusion	241
5 SUMMARY AND CONCLUSION	243
