ACKNOWLEDGEMENTS

Probably the only reason why I decided to do a Ph.D. was my teacher-cum-supervisor, Prof. Madan Mohan Chaturvedi. I owe to him a lot for inculcating the motivation for science and research in me. His guidance, not only for research, but for the overall perspective of life has taught me a lot. No word can express my gratitude towards you, sir... Thanks a ton...

My sincere gratitude is due to Prof. K. Muralidhar, Prof. Rup Lal, Prof. Umesh Rai, Dr. Anju Shrivastava and Dr. Sharmila Basu Modak for their concern, Intellectual support and lab facilities they provided to me.

I am also indebted to the previous heads and present head of the Department of Zoology for providing the facilities for carrying out my research.

I acknowledge the motivation, inspiration, guidance and support I got from my seniors in the lab, Dr. Shashibhal Pandey, Dr. Satchidananda Purohit, Dr. Divya and Dr. Anshu Arora.

I’d like to thank my seniors Pandey sir and Sachin sir whose motivation towards research attracted me to ‘Laboratory for Chromatin Biology’.

The unconditional support and guidance from Divya di deserves special thanks.

I especially thank Anshu di for being next to me whenever I needed a support, scientific or personal. I thank her a lot for all the help she provided throughout my stay in the lab, with special note to thesis part.

Sonal would be next in the list, who has been a friend beyond lab. Her helping hands were always ready through these years for which I shall always be highly thankful to her.

Neetika and Abhilasha have always been delightful juniors who made this journey enjoyable and memorable.
My friends and colleagues in the department are also acknowledged for all the help and support they provided to me.

I’d also like to thank our lab attendant, Ramakant ji here, along with many unnoticed members who indirectly contribute to well-functioning of the lab. The non-teaching staff of Zoology Department, Delhi University also deserves my sincere thanks here.

Financial support from Council of Scientific and industrial Research (CSIR), and University of Delhi are gratefully acknowledged. The research grant from Department of Science and Technology (DST), and University of Delhi to Prof. M. M. Chaturvedi were of immense help in carrying out the present work.

I do not have any adequate word to show my gratitude towards my parents for the love, care, encouragement, wishes and support, they provided me. ‘Thank you’ can never suffice what all they blessed me with. My brother, sister and their families have always been a supporting pillar through all the odds during Ph.D. tenure. I would also like to acknowledge the support that my wife provided during thesis winding time.

Finally, I’d like to pay my sincere gratitude to all who directly or indirectly helped me to achieve whatever little I could. Thank you to all...

Sudhir Verma
