LIST OF PLATES

Plate-1 Different types of chronic wounds
   a) Sample collection
   b) Accident wound
   c) Bite wound
   d) Septic wound
   e) Burn wound

Plate-2
   a) Morphology of *Staphylococcus aureus*
   b) Biochemical characterization of *Staphylococcus aureus*

Plate-3 Lipase activity of *Staphylococcus aureus*
   a) Vogel Jonsons Agar Medium
   b) Lipovitellin Mannitol Salt Agar
   c) Baird Parker Agar

Plate-4
   a) Antimicrobial Susceptibility of *Staphylococcus aureus*
   b) Minimum Inhibition Concentration (MIC) using Comb Test

Plate-5 Minimum Inhibition Concentration (MIC) of oxacillin for selected MDR-MRSA

Plate-6 Phenotypic Identification of MRSA using selective media
   a) Mannitol Salt Agar
   b) Oxacillin Resistant Screening Agar Base
   c) CHROM Agar *Staphylococcus aureus*
   d) Baird Parker Agar
   e) Blood Agar
   f) Mueller Hinton Agar

Plate-7 PCR Analysis for mecA Gene

Plate-8 Plasmid Profile of Multi Drug Resistant MRSA

Plate-9 Plant Seeds

Plate-10 Minimum Inhibition Concentration (MIC) of Ethanol Seed Extract – *(Mangifera indica)* against selected MDR-MRSA
Plate-11 Anti MDR-MRSA Activity of Different Solvent Extracted seeds

Plate-12 Time Killing Assay in 4xMIC Concentration of Plant Seed Extract against MDR-MRSA

Plate-13 Mutagenicity of Seed Extracts on Salmonella typhimurium TA98

Plate-14 a) Bioautography Assay
b) TLC Finger Printing
c) Column Chromatography
