ACKNOWLEDGEMENT

The pursuit of this thesis has taught me many valuable things: that everything is possible if you are determined and believe in what you are doing, and, that some periods on the timeline of a person’s life can be so crowded and complicated that you think you will never complete them, but eventually you will.

First, I would like to thank my Respected Sir, Dr. M. B. Dholakia, Professor, L. D. College of Engineering, Ahmedabad. He has inspired and encouraged me from the inception of preliminary work on watershed development. He has guided and supported during the development of this work for collection of data, analysis and thesis preparation. Under his visionary guidance, I was able to write the research papers for the International and National Conferences.

I express my sincere thanks to Director of Technical Education, Gujarat state, Gandhinagar for permitting me to carry out this work as an external student to Gujarat University, Ahmedabad.

This research work might not be completed without the constant and encouraging blessed support from our visionary Principal, Dr. M. N. Patel, L. D. College of Engineering. It is my great pleasure to be heartily thankful for ever to him.

I express my sincere thanks to Prof. A M. Malek, Head of Civil Engineering Department, L. D. College of Engineering, for his hearty co-operation in all respect to me to carry out this work. I am thankful to Prof. J. M. Patel for helping me constantly in this work. Above all I express my gratitude and thanks to Prof. K. M. Shah to inspire me initially to carry out the research work. I am thankful to my all colleague Professors who have helped me by giving their valuable suggestions.

I express my sincere thanks to Principal, Prof. B.M. Vader, Government Engineering College, Surat and all faculty members of Civil Engineering Department, G.E.C. Surat for their hearty co-operation in all respect to me to finish my thesis work.

I am thankful to State Water Data Center (SWDC), Gandhinagar for providing rainfall data of Idar rain gauge station and Bhaskaracharya Institute for Space Application and Geoinformatics (Department of Science and Technology, Government of Gujarat) for providing
satellite image of the study area. I am also thankful to Agricultural Department of Gujarat Govt. for providing Crops and Fertilizers data.

I thank the Librarians and other library staff at Library, L. D. College of Engineering, Ahmedabad, Library, IIT Mumbai and Library, SVNIT, Surat for providing literature for my research work.

Finally, I am deeply indebted to my family for their encouragement and help. My special thanks to my wife Mrs. Gajara, who many times played my role for the fulfillment for our family needs and social responsibilities. My special thanks to my children Krushnkumar, Hetal and Harshkumar for their support.

Lastly, thanks to all of them for being close to me when I needed them the most.

March, 2013
Ahmedabad.
