Acknowledgement

Research is the process of converting a useless stone to a wonderful creation. It is a continuous process of perseverance till the desired outcome is achieved. It widens our vision, fills us with confidence and fuels the fire of determination to succeed inside us so that we can start our journey on the “road less travel” unhesitantly. Research is like putting focus on some dark obscure facts of universe about which everybody know but nobody dare to go into. The work embodied in this thesis is a handful of contribution to the boundary less research taking place globally. As one flower doesn’t make a beautiful garland, my thesis would not have been a reality without the wholehearted encouragement and active participation of some magnanimous souls. Taking into consideration the limits of the pages I would like to acknowledge as many as possible the contribution from them.

First of all, I am thankful to the God for always being with me and blessing me with good family, friends, teachers and well wishers.

I would like to thank Almighty, the supreme soul whose unseen guidance made this work possible in a useful way. Whatever you do, there is a reason behind it and it is this reason, which directs you towards the success. With proud and honor, I can say that Dr. M. T. Chhabria, M. Pharm., Ph.D., F.I.C.S. Asst. Prof., Dept. of Medicinal Chemistry, L. M. College of Pharmacy, is the energy without which I could not reach at this stage. I know words are not enough to mention the efforts and ideas, which are the inspiration for me, rather for each one who was under his guidance. His enthusiasm, cooperativeness, remarks, criticisms and suggestions constantly motivated me to put everything to achieve the target without being
disappointed by failures. Generally failures are the end of the things but not for Chhabria sir who has taught us from the failures are stepping stones of success.

I wish to thank Mr. I. S. Rathod, M. Pharm., Asst. Professor, Department of Pharmaceutical Chemistry, L. M. College of pharmacy, Ahmedabad, for his invaluable guidance throughout my project work.

I convey my sincere gratitude to Dr. B. N. Suhagia, Professor and Head, Department of Pharmaceutical Chemistry and Quality Assurance, L. M. College of pharmacy, Ahmedabad for their positive approach.

I thank Dr. M. C. Gohel, Principal, L. M. College of pharmacy, Ahmedabad, for providing me the laboratory facilities for my project work.

A special thanks to Dr. Guarang B. Shah (Principal, K. B. Institute of Pharmaceutical Research and Education) for their support, cooperation and suggestion for pharmacological screening of the compounds.

A special thanks to Dr. Tejal Gandhi (Principal, Anand Pharmacy College) for their support, cooperation and suggestion for pharmacological screening of the compounds.

A special thanks to Dr. Regin Shah (Principal, Arihant School of Pharmacy and BRI) for their support and cooperation.

From core of my heart, I am very grateful to Ph. D. colleague, Mr. Shailesh Patel and Mr. Mitesh Jani for their cooperation and valuable suggestions throughout my work.
There are some persons who were always there, when I really needed someone my side. They are my students cum friends like Jinali, Dhanwanti, Sandip, pankaj, Bishwamohan, Chirag, Dharmistha, and Smita. I can not forget those colorful days and cherishing moment spent with them in the lab. I am fortunate to have friends they gave me moral support, constant inspiration, encouragement and motivation that help me to complete my project. Their valuable inputs and correction of my mistakes will help in my life also.

I want to express my sincere thanks to the entire library staff including Sanjaybhai, Ashwinbhai, Bharatbhai (Jay Chemistry) and Joshikaka for their cooperation. I am also thankful to office staff especially to Nileshmama, Shastribhai and Chavdabhai for their kind cooperation. I feel pleasure to give my special thanks to non-technical staffs namely Rajubhai for their help during my project work.

I express my deepest sense of gratitude in remembering the love, affection and motivation received from my Mummy-Papa and my Father-in-low-Mother-in-low. I am fortunate to have Parents like mine. My sincere thanks and appreciation to my beloved parents, for there support, sacrifice and for the pain they have taken in bringing me up to this position. It is impossible to repay their debt in my life. What I am today is only because of them. Thus I believe just saying thank you to them surely not sufficient for the priceless thing they have done for me.

I would like to express my cordial thank to my respected Vishnudada and Late Manoramaba for always give me their blessings.

I would like to express my cordial thank to my brother Vikas and sister-in-law Sonal for always give me support.
From core of my heart, I am very grateful to my friend cum philosopher NISARG for their friendly cooperation and valuable suggestions throughout my work.

“Thanks” word is not enough for one person, yes; he is my world’s best husband DHAVAL. He had always encouraged me for my work. He always supported me and helped me for any problem.

Last but definitely not the least, I pay my reverence to this institute, L. M. College of Pharmacy. I am undeniably proud to be associated with this college.

I whole heartedly thank all those who have stretched their helping hands towards me directly or indirectly for successful completion of this thesis.

“Learn as if you were to live forever.
Live as if you were to die tomorrow.”

"It doesn't matter who you are, where you come from. The ability to triumph begins with you always."

July 2011
