

ACKNOWLEDGEMENTS

It gives me great pleasure to express my profound gratitude and indebtedness to Professor T.S. Sadasiven, D.Sc.(Lond)., F.N.I., F.A.Sc., Director, University Botany Laboratory, Madras, for suggesting the problem, guidance and critical discussions.

It is a pleasure to record my thankfulness to all my colleagues and Dr. R.S. Badami, Ph.D.(Lond), whose zealous co-operation has been a fountain of help and inspiration.

To the California Corporation for Biochemical Research, I wish to express my thanks for their kind supply of some amino acids.

I thank the University of Madras and the Government of India for awards of scholarship during the tenure of which this work was carried out.
