

STUDIES ON NODULAR BACTERIA (P)

C O N T E N T S

COMPUTERISED

	Page
INTRODUCTION	1
MATERIALS AND METHODS	9
EXPERIMENTAL:	
CHAPTER I: Nitrogen fixation by <u>Rhizobium</u> strains	23
CHAPTER II: Comparative studies on the absorption spectra of haemoglobin of ox-blood and root nodules	34
CHAPTER III: The synchronisation between host plant development and symbiotic development in <u>Arachis hypogaea</u> L	40
CHAPTER IV: The influence of the environment on symbiotic expression in <u>Arachis hypogaea</u> L	49
CHAPTER V: The synthesis of haemoglobin in root nodules and chlorophyll in leaves in relation to nodule formation	61
CHAPTER VI: Haemoglobin content of legume root nodules	73
CHAPTER VII: The effect of virus infection on nodule formation	83
CHAPTER VIII: Free amino acids in legumes in relation to health and disease	95
