ACKNOWLEDGEMENT

The author is extremely indebted to his research supervisor Dr. R. Jayavel, Crystal Growth Centre, for his guidance and valuable scholarly advice to carry out the present investigation. The author is grateful to Prof. D. Arivuoli, Director, Crystal Growth Centre and former directors of Crystal Growth Centre Prof. R. Dhanasekaran and Prof. J. Kumar for their support. The author is also thankful to Prof. S. Moorthy Babu, Prof. K. Baskar and Prof. S. Narayana Kalkura and other staff members of Crystal Growth Centre for their kind support.

The author thanks whole heartedly Prof. X.F. Han, Dr. Hongxiang Wei and other members of State Key Laboratory for Magnetism MO2 group, IOP, China for their kind support to carry out characterization studies. The author is deeply thankful to Prof. S. Arumugam, Bharathidasan University for his help and moral support in his progress.

The facilities offered by Prof. P. Mandal, Prof. S.N. Das and Mr. Arun Paul, Saha Institute of Nuclear Physics, Kolkatta, are gratefully acknowledged. The author is thankful to Dr. K. Ashokan and Dr. Ravi Kumar, IUAC, New Delhi for their kind support to carry out irradiation studies. The author wishes to thank the TWAS and CAS for CAS-TWAS fellowship and CSIR, Govt. of India for the award of Senior Research Fellowship. The author is thankful to IUAC, New Delhi for the irradiation facility and financial assistance. The author is grateful to all the research scholars of Crystal Growth Centre and thankful to his friend G. Tirupathi and his family members for their kind support.

M. RAMESH BABU
