List of Figures

1.1 A schematic diagram of electron scattering 4
2.1 Radial charge density curve for Ne atom 38
2.2 Potential curves of $V_{SR}$ and $V_{LR}$ in $V_{cp}$ for Ne atom 45
2.3 Radial charge density and absorption potential for O atom at 100 eV 49
2.4 $Q_{inel}$ for Electron impact on Nitrogen atom 51
2.5 Variation of $\Delta$ with respect to incident energy $E_i$ for N atom 51
2.6 A comparison of the realistic dipole potential model with point dipole model 59
3.1 Electron scattering total cross sections of Be- atom 69
3.2 Total ionization cross sections of atomic Be by electron impact 69
3.3 Electron scattering total cross sections of B- atom 72
3.4 Total ionization cross sections of Boron atom by electron impact 72
3.5 Electron scattering total cross sections of N- atom 75
3.6 Total ionization cross sections of Nitrogen atom by electron impact 76
3.7 Total ionization cross sections of Phosphorus atom by electron impact 79
3.8 Total ionization cross sections of Arsenic by electron impact 81
3.9 Total ionization cross sections of Antimony by electron impact 84
3.10 Total ionization cross sections of Bismuth by electron impact 86
4.1 Electron scattering cross sections with molecular H$_2$ (GS) 105
4.2 All total cross sections of H$_2$' by electron impact in Å$^2$ 108
4.3 Electron scattering ionization cross sections with H$_2$' (c$^3\Pi_u$) state 109
4.4 Electron scattering cross sections with molecular O$_2$ 111
4.5 All electron impact total cross sections of molecule N$_2$ (GS) in Å$^2$ 115
4.6 Electron impact ionization cross sections of N$_2$ (GS) in Å$^2$ 116
4.7 All total cross sections of N$_2$ metastable by electron impact in Å$^2$ 117
4.8 Electron impact ionization cross sections of CO in Å$^2$ 120
4.9 All Electron impact cross sections of HCN molecule 122
