Acknowledgements

The completion of my PhD has been long journey. It’s true that “Life is what happens” when you are completing your dissertation. Life doesn’t stand still, nor wait until you are finished and have time to manage it. Much as happened and changed in the time.

Special mention goes to my enthusiastic supervisor, Dr. H. A. Modi. My PhD has been an amazing experience and I am thankful to Sir wholeheartedly, not only for his tremendous academic support, but also for painstaking help and concern for my project work.

Similar, profound gratitude goes to my Dada, who has been a truly dedicated mentor. I am particularly indebted to him for his constant faith in me, and his conditional love.

I am also hugely appreciative to Prof. N. K Jain, Prof. S.R. Dave and Dr. R V Upadhyay especially for they’re indirect of direct help towards my work.

Special mention goes to Mr. Devang Joshi for his unconditional mental support and guidance.

I would like to thank my near and dear ones Janki didi, Hilor, Gopit bhai, Iyer sir, Micky, Mitali, Edwin, Sanjay, jyotsna masi, lata masi for going far beyond the call of duty.

To Suresh bhai of D G poultry Farm Piplata, for their associations with me and for providing me with a fantastic lab training and assistance.

Finally, but by no means least, thanks go to Dada, kaka, kaki, Papa, and kintu for almost unbelievable support. They are the most important people in my world and I dedicate this thesis to them.
