ACKNOWLEDGEMENT

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me, to only some of whom it is possible to give particular mention here.

The true hallmark of a teacher is his ability to distinguish between a necessary and unnecessary hypothesis. It is my extreme good fortune to be associated with my research guide, Dr. Sunil Kumar, Scientist-F, Dept. of Reproductive and Cytotoxicology, National Institute of Occupational Health (ICMR), Ahmedabad. His wide knowledge and his logical way of thinking have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present thesis. His positive criticism, perseverance and tolerance to my idiosyncrasies have led my research work to this stage.

I am sincerely grateful to Dr. H.N. Saiyed/ Dr. S.K. Dave/ Dr. P.K. Nag, Director/ Officer-in-charge of this institute, for taking interest and permitting me to work.

I owe my most sincere gratitude to Mr. B.C. Lakkad, who gave me the opportunity to work with them in the Department of Environment and Carcinogenic and for his untiring help during my difficult moments.

I am also grateful to Prof. Dr. Girish Parmar, Dean, Government Dental College and Hospital, Ahmedabad for the continuous support and permission to use the facilities of the sample collection for this study. I also wish to thank Dr. Mandip, Dr. Neha, Dr. Shyam, Dr. Priyanka, Dr. Kevin and Dr. Piyush for their clinical support.

I extend my regards to Dr. Thomas leihr (Institute of Human Genetics and Anthropology, Jena, Germany) for providing the probes for Fluorescent in situ hybridization and Dr. Beena Patel for her valuable guidance and sending various important research articles needed for the thesis.

My sincere thanks are due to Dr. Vijay Shivgotra for his guidance in statistical analysis. A word of appreciation to Dr. L.J. Bhagya and Mr. P.B. Doctor for extending their departmental facilities for my experimental work. I am also thankful to the Librarian and their staff for kind cooperation.

I am deeply indebted to the support and help extended to me by all the staff members of Reproductive and Cytotoxicology division. I would specially like to thanks Mr. Yogendra Verma and Mr. Anil Kumar Gautam who had
provided the environment for sharing their experiences about the problem issues involved as well as participation in stimulating team exercises and developing solutions to the identified problems. I also appreciate Mrs. Kamlesh Agarwal and Mrs. Bharti Shah for their unconditional help during my work. Thanks are due to Vijay Patni, Pravin Patni, Vinod Patani and B.H. Vaghela for their kind help in miscellaneous things.

During this work I have collaborated with many colleagues for whom I have great regard, and I wish to extend my warmest thanks to Ms. Shagufa Shaikh, Mrs. Archana Kumari, Mr. Bharesh Mojidra, Dr. Jaysukh Kathiriya, Dr. Uday Kapurkar, Ms. Sapna Sedha, Mrs. Komal Prajapati, Mr. Rahish Ahmad and Ms. Rachana Sabhani who helped me at various stages of this work.

This thesis would not have been possible without the help, support and suggestions of my colleague and friend Ms. Shiva Murarka. Her extensive discussions around my work and interesting explorations in research work have been very helpful for this study.

I offer my appreciation to all the subjects who willingly co-operated with me for my study. I pray for the subjects for their well-being without whom, this work would not have been completed. I also thanks all my well wishers, who knowingly and unknowingly have helped in completing my thesis.

Parents are the most fundamental and inspirational sources at each and every stage of my life. Today, where I am is due to my parents, Shri. Shashikant Joshi and Smt. Chandrika Joshi and take this opportunity to dedicate this thesis to them. I would be failing in my duties as an elder brother if I would not thank my brother, Milan Joshi and dear sister, Mital Joshi for boosting my moral during weaker moments. No words will suffice to proper heartfelt gratitude towards my late grand father Shri. Gaurisankar Joshi for supporting my work.

Last, but not least, I would like to thanks the omnipresent Almighty for giving me the will, patience and perseverance to complete this task.

Mayur Joshi
