List of Tables

Table 1.1  Evolution of molecular sieve materials  
Table 1.2  IUPAC designation of some zeolites and year of innovation  
Table 1.3  Some natural and synthetic zeolites  
Table 1.4  The raw materials, the source of raw materials and their function in the zeolite synthesis  
Table 1.5  Metal ions exhibiting tetrahedral coordination and their ionic radii (Szostak, 1989)  
Table 1.6  Information obtained from XRD patterns  
Table 1.7  The assignments of the main IR bands  
Table 1.8  Informations drawn from SEM pictures of zeolites  
Table 2.1  Molar ratios of the components in the gel and other conditions maintained during the synthesis of the MFI zeolite samples  
Table 2.2  Molar ratios of the components in the gel and other conditions maintained during the synthesis of the MFI zeolite samples  
Table 2.3  Crystallite size and percentage of crystallinity ($C_{hkl}$) of the synthesized MFI sample  
Table 2.4  Specific surface area, pore size and pore volume of the synthesized Samples  
Table 2.5  Unit cell parameters of Zr-MFI samples  
Table 2.6  Shift in 2Θ value of 50I peaks of the Zr-MFI samples with respect to parent MFI  
Table 2.7  Crystallite size and percentage of crystallinity ($C_{hkl}$) of the synthesized Zr-MFI sample  
Table 2.8  Percentage of weight loss of the Zr-MFI samples observed during TG Analysis
Table 2.9  Specific surface area, pore size and pore volume of synthesized Zr-MFI Samples  85
Table 2.10  Theoretical and determined amount of Zr incorporated in the synthesized samples  85
Table 3.1  Molar ratios of the components in the gel and other conditions maintained during the synthesis of In-MFI zeolite samples  93
Table 3.2  Molar ratios of the components in the gel and other conditions maintained during the synthesis of Ru-MFI zeolite samples  94
Table 3.3  Expansion of unit cell with increasing level of In in MFI samples  99
Table 3.4  Shift in 2θ value of 501 peaks of the In-MFI samples with respect to parent MFI  100
Table 3.5  Crystallite size and percentage of crystallinity (C_hkl) of the synthesized In-MFI sample  100
Table 3.6  Percentage of weight loss of the In-MFI samples observed during TG Analysis  105
Table 3.7  Specific surface area, pore size and pore volume of synthesized In-MFI Samples  110
Table 3.8  Expansion of unit cell with increasing level of Ru in MFI samples  115
Table 3.9  Shift in 2θ value of 501 peaks of the Ru-MFI samples with respect to parent MFI  115
Table 3.10  Crystallite size and percentage of crystallinity (C_hkl) of the synthesized Ru-MFI sample  115
Table 3.11  Percentage of weight loss of the Ru-MFI samples observed during TG Analysis  120
Table 3.12  Specific surface area, pore size and pore volume of synthesized Ru-MFI Samples
