Words are often too less to express one’s deep regards. The endeavour towards the completion of this thesis involves the hand of many well wishers. I extend my heartfelt gratitude to all of them with whose guidance and assistance in one way or the other contributed to this work. I express my acknowledgements to:

My supervisor and Head of Department, Prof. Avinashi Kapoor, for his patience when explaining the principles of solar cells, who has supported me throughout my research work in terms of his in-depth subject knowledge, infrastructure and all other research facilities. My sincere gratitude to him for allowing me the space to work in my own way, giving me freedom to choose an area for my research work from a wider spectrum in the field, and develop independent thinking and research skills. His adept guidance, motivation, support and belief in me, helped me a lot in bringing out this thesis. His technical and editorial advice was of immense importance to the completion of this thesis.

My very friend Dr. Amit Jain for the insights he has shared during the course of research. His never tiring attitude and constant support has made it possible to the completion of this thesis. Many of the ideas in this work originated in discussions with him. My hearty thanks to him for all those thought provoking conversations and for being a constant driving force in this odyssey.

My deep regards to the faculty members of the Department of Electronic Science - Prof. A.K. Verma (former Head), Prof. R.S. Gupta, Prof. K.N. Tripathi, Prof. R.M. Mehra, Prof. E. K. Sharma, Prof. P.K. Bhatnagar and Dr. Mridula Gupta for their valuable suggestions and advice.
My friends in the lab., Dr. Udaibir Singh, Dr. Sandeep, Dr. Piyush for the camaraderie and discussions. Mr. Anil needs a special mention for sharing and running around in the campus for the official works. Also to other lab members-Premkumar, Sanjeev, Neha, Nisha, Renu for giving a moral boost up to the completion of this work.

An army of friends and well-wishers (not in this order) –Dr. SK Dhaka, Dr. Sanjay Malik, Dr. Yudhvir Sharma, Dr. AP Singh, Dr. Pankaj Garg, Dr. Nawal, Dr. Varun (Rajdhani College), Nirmal, Tungin, Inao, Jimni, Dr. Manish Kansal, Dr. Pradumn kumar, Lalit, Dr. Vijay Garg, Abhay Ranjan (Hindu College), Dr. Shanta Laishram (ISI), Dr. Suheshkumar (IISc), Dr. Genemala (IIT Mandi).

The Dean, the Joint Dean and the colleagues at the office of DSW, University of Delhi for giving me a window to complete the thesis at the time when there was full of activities going on in the university.

Mummy and Papa (My father-in-law and mother-in-law) whose blessings and best wishes were always there with me. Their everlasting love and care both at the home and office front made it possible in the completion of this work. Without their invaluable support the thesis would not have been completed. Dada, for his encouraging words and hearty talks providing the much needed morale boost-up in seeing the silverline at the horizon. The affection of Iche and Munu (niece) is noteworthy, creating a palace like environment in that sultry winter at our new home. The arrival of Puttoo (nephew) enhances the joy in our extended family.

God bless and love you all.

The love and blessings of my parents, whether they were far or near, who have supported and encouraged me in whatever I have chosen to do despite their limitations and ignorance.

My late mother never let me get away with giving less than my best, and never, ever let me
get away with not doing my homework. My father, for igniting the spark of my interest in science, and strengthening inner self perseverance. Lots of love to both of you. To my brothers- Tajou, Tamma, Taton, Mio for their constant support and motivational words. Ichemhan, Iteima, Iteimaton, Sushima, Devimani, Robot, Muthi, Little Puttoo- for making our home a lively place. Love you all.

Nungshi- my little daughter, for making our little world looked so beautiful by her presence. Her energetic and missile of questions on the physical facts around us remind me to be vigilant in choosing the words for the thesis. Her innocent acts, beatific smiles and sparkling eyes gave the much needed moral boost-up to move forward with full of life. Last but not the least, my wife (Anne) for bearing all my nuances and do away the whole negative energy, making it possible to focus on the task ahead. For her exhaustive editing, starting from the first line till the end, through night and day despite the constant grinds to be attentive towards Nungshi. The thesis would not have seen the days light if it were not for her meticulous approach of collecting the information, technical settings and finalizing the drafts in the format I was looking for. Tons of love to both of you for making our life complete.

Naorem Santakrus Singh
