ACKNOWLEDGEMENTS

The grace of God and His blessings have enabled me to reach the stage of presenting my work in the form of present thesis. I take this opportunity to acknowledge the important contributions that many people have made over the past few years in many ways to help me reach at this stage.

First and foremost, I express my earnest gratitude to my supervisor Prof. S.C. Arora for his valuable guidance and keen supervision. Throughout my research, I benefited enormously from his vast knowledge, deep insights, tremendous experience and command over the subject, which is par excellence. He has always been accessible, highly encouraging and deeply concerned. I feel fortunate and proud to be his student.

I express my sincere thanks to all the professors who had been the Heads of the Department of Mathematics, University of Delhi, during my period of registration of pursuing my this research work and in particular the present Head, Prof. B.K. Dass, currently my Joint Supervisor also, for their precious suggestions, support and words of encouragement besides the necessary infrastructure and other facilities during the tenure of my research.

I also take this opportunity to thank the administrative and library staff of the Mathematics department for always being so co-operative and helpful.

I gained a lot from the weekly seminars of the research group of Operator Theory in our mathematics department through discussions and sharing thereby improving my research skills. My profound appreciation and sincere thanks are to everyone in the group.

In my family, I am thankful to my father for his sacrifices and blessings that rendered an unparalleled source of inspiration and optimism to take up and pursue my research work. I would like to thank my mother-in-law who took charge of my duties at times to enable me to devote time to studies. Words fail me to express my thankfulness to my husband for being there to help me in all possible ways with persistent confidence in me through each
and every day of these years. I also thank my sweet children for the strength that I derive from their love and innocence.

I take this opportunity to pay tribute to all the outstanding mathematicians of the past whose contributions to the subject have led me into this research.

I acknowledge M/s Scientific Documentations for carrying out the computer typesetting of the manuscript so well.

Last but not the least, I owe my special thanks to all those who have helped me directly or indirectly to accomplish this task.

April 2012
