ACKNOWLEDGEMENT

First and foremost I must thank God, the almighty who granted me the ability to accomplish this research work.

It is indeed my pleasure to thank the people who have been instrumental in the successful completion of this work.

Words are not sufficient to express special gratitude to my supervisor Prof. Pradeep Bhatnagar, who has been an excellent source of inspiration for me. He encouraged me throughout my research work and helped in developing a research aptitude. His advices on planning of experiments to interpretation of results and then summarizing them in the form a thesis have been priceless. I hope that even I could be as enthusiastic and intellect as Prof. Bhatnagar. I appreciate all his contributions in making my thesis productive and stimulating.

I am extremely indebted to Dr. Ashok Gupta, Vice Chancellor and Dr. Raakhi Gupta, Rector and Registrar, The IIS University for providing necessary infrastructure and resources to accomplish this research work and to provide financial assistance in the form of a minor research project.

I would like to acknowledge with much appreciation the help extended by my friend, fellow colleague and labmate Ms. Payal Mehtani without whom this work would have not taken its present shape. She was there to help me in every aspect of my work, starting from planning and setting up of experiments, simultaneously running her own, staying back with me in the lab till 10’o clock in the night to complete the work and also helping me in writing, analyzing and concluding the results for my thesis. Her support, guidance and friendship were vital that kept me encouraged in my difficult times.

I am grateful to Dr. Nupur Mathur, Associate Prof., University of Rajasthan, Jaipur who encouraged me to pursue interest in bioactive potential of actinomycete and thus guided me in selecting the topic of research. She always helped by giving her scientific advice and insightful discussions to take this work forward.
Many thanks to Mr. M. M. Bhardwaj, Managing director Sambhar Salt Limited for providing permission to collect water samples and to the workers of the plant for helping me in the same. I also acknowledge the University Grants Commission (UGC), Bhopal, India for funding a minor research project for two years which supported me to perform work unperturbed. The results of phylogenetic analysis and 16S rDNA sequencing were obtained by the help of Xcleris labs, Ahmedabad, India and thus I also extend my gratitude to them.

I express my sincere thanks to Dr. Sreemoyee Chatterjee, Head, Discipline of Biotechnology for her sincere help, valuable suggestions and cooperation extended throughout the research work as a friend. I take this opportunity to thank all the faculty members of the discipline Dr. Radhika Sharma, Dr. Neha Batra and Dr. Ameeta Sharma for supporting and cheering me. I am also thankful to Ms. Kirti Mathur, Mr. Pankaj Sharma, Mr. Anand Agarwal and Mr. Rajaram Prajapati who took care of the laboratory requirements and assisted me in my experimental work.

I have been greatly benefitted by the suggestions of Dr. Bhawna Arya and Ms. Priyanka Raghuvanshi, who helped me in the statistical analysis of the scientific data generated. In addition, I would like to thank the faculty members of zoology, botany, chemistry and environmental science for providing permission to use the equipments of their labs and also to Mr. Sanjay Mathur, for taking photographs of the culture plates.

My thanks are due to Dr. Ashish Bhatnagar, Associate Prof., M.D.S. University, Ajmer and Dr. Krishna Mohan, Head and Senior Scientist, BISR, Jaipur for sharing their resources for literature search and also for their valuable suggestions and criticism. Help provided for using the library facility of Birla Institute of Technology, Mesra, Ranchi is also gratefully acknowledged. Thanks are also due to Titu Thesis Centre, Jaipur for timely binding of the thesis.

Words are short to express my feeling of appreciation towards my husband Mr. Anish K. Sharma for his unconditional love, support and constant patience.
during past years. He encouraged, cheered and always stood by me both in good and tough times. This work would not have been completed without his support and help. I am blessed to have him as my better half and will always be thankful to the almighty for bringing him in my life.

With deep love and affection I always remember my father whom I lost at the beginning of my Ph.D. work. He always dreamed for me to be called as doctor and now his dream is approaching reality. It was because of the love, support and encouragement provided by him and my mother too that I was able to do well throughout my academic career and reached at this stage of putting a step forward in academics and research.

I am also thankful to my mother-in-law who took care of all the household jobs in the past years so that I could pursue my Ph.D. comfortably. I am also grateful to Mr. Prateek Chaturvedi, my friend for his help and support. Lastly, I would like to thank all my family members for their endless love and understanding.

CHARU SHARMA
