Acknowledgement

First of all, I would like to thank the ALMIGHTY (SUBHANA-WATALLAH) for bestowing me His mercy and blessings.

When every hope is gone and helps flee: assistance comes from where I know not, this is the essence of ALLAH.

I dedicate this thesis to the ALMIGHTY ALLAH.

With sincere regards and tributes to Late Sir Syed Ahmad Khan, the founder of this prestigious institution, the Aligarh Muslim University, Aligarh. I would like to express my deep and sincere gratitude to my supervisor, Dr. Mohd. Shamim Khan for his continuous support during my Ph.D study and research, for his patience, motivation, enthusiasm, and immense knowledge.

Besides my advisor, it is an honour for me to thank Dr. Shadab Khursheed, Chairman of Department of Geology, Aligarh Muslim University, Aligarh, for providing the various facilities of the Department, during the course of my research work and for his invaluable help, constructive comments, and most importantly his administrative support throughout this work.

I wish to express my warm and sincere thanks to Professor Mekshar Raza, Department of Geology who took me on the process of learning and made himself available despite his very busy work and teaching schedule. He has this special quality of encouraging and prompting young talents for advanced research. Thank you doesn’t seem sufficient but it is said with appreciation and respect.

There are many people who have helped me on my way here. I would like to acknowledge the DDG and all faculty members of Geological Survey of India, Training Institute, Hyderabad for their kind cooperation towards sharing their knowledge regarding the subject during my time at the training institute. Sincere thanks are also due to the DDG, Geological Survey of India, Nagpur and my Director, CT and HOO of Operation Maharashtra (W) for their cooperation. I learnt a great deal from all of the people in GSI, especially my office mates in Pune centre (particularly, Dr. M.S. Bodas, Shri D.S. Jeere and Dr. C. Joshi, Sr. Geologist, GSI, Pune).

I would like to thank the many people who have taught me, my school teachers at La Martiniere Girls’ College, Lucknow, and my graduate teachers at Lucknow University. For helping me in being what I am today and preparing me for this long journey towards research. I would also like to show my gratitude to the lecturers and professors of Department of Geology, AMU, Aligarh, especially Dr. M.E.A. Mondal, Dr. A.H.M. Ahmad, Dr. Rashid Umar, Dr. S.H. Alvi, Dr. Sheik Rashid, Dr. Abdullah Khan and many more for their kind assistance, valuable advice, helping with various applications, efforts to explain things clearly and simply.

I acknowledge and would also like to thank NIO, Goa and NGRI, Hyderabad for providing analytical facilities, technical support and the infrastructure for doing research.

I wish to express my sincere thanks to my supervisor, seniors and colleagues for their help in using various softwares, providing relevant literature, fruitful discussions and suggestions during different stages of my research.
Gratitude is expressed to Mr. Salman and Mr. Sakti for extending useful material help and company during field visit and investigations. Thanks are also due to for their stretched technical support.

I also express my thanks to Mrs. S. Bano, librarian, Department of Geology, Aligarh Muslim University and non-teaching staff in the department of Geology, for assisting me in many different ways.

I want to thank my friends in the department for their cooperation and support and would take this opportunity to offer my sincere thanks to all my batchmates seniors/friends particularly Mrs. (Dr.) Aabiroo Habib, Mr. M.Y. Khanday, Mr. Sajad Ahmad Wani, Ms Sana Sabir, Mr. Tauheed Khan and Ms. Tanu Verma for their valuable help throughout this work whenever needed. I may not remember the names of all the persons, who in one way or the other helped me during my studies but I am thankful to them and obliged to all of them. Thanks are also due to everyone for making my Journey through Aligarh Muslim University all that much better.

I would also like to gratefully acknowledge the support of some very special individuals Umaima Gazal and Tanushree Mohan. They helped me immensely by giving me encouragement and friendship. I also acknowledge Ms. Ghazala Anjum for being a wonderful roommate and putting up with lot of things especially during the course of my research.

The financial assistances received first from the UGC Major Research Project [F.N0. 34-46/2008(SR)] and later on under Junior Research fellowship scheme from the CSIR-UGC (Ref. No.20-6/2009(i)-EU-IV) are greatly acknowledged.

I do not find suitable words that can fully describe my thanks, due to my mother for her unflagging everlasting love. Without her I would be a very different person today, and it would have been certainly much harder to finish a PhD. My family although sometimes mystified by the subject matter of my work, have rarely questioned its value and have provided peaceful sanctuary over the last few months to allow some intensive writing. I thank my family for the love and patience they have for me.

Last of all my gratitude must fall upon my most patient companion, who has shared most of the ups and downs of this thesis. I hope that I can reciprocate the same when the time comes.

Sadaf Fatima
