ACKNOWLEDGEMENTS

In the name of Allah, the Most Beneficent and the Most Merciful. All praises to Allah the Almighty for giving me the strengths, guidance and patience in completing this thesis.

I feel a great pleasure and honor to express my heartfelt gratitude to my esteemed teacher and worthy research guide Dr. Abdul Malik, Associate Professor, Department of Agricultural Microbiology, Aligarh Muslim University, Aligarh for his competency, supervisory intellectual and sympathetic attitude throughout the course of this research endeavor. His intelligible dissemination of knowledge gained through vast experience, helped me to understand the Science of Microbiology. The completion of this research work would have been a dream for me without his consistent motivation and help. I deem it as my privilege to work under his able guidance. I ever remain grateful to him.

It is a matter of pleasure to extend my sincere thanks to Dr. Iqbal Ahmad, Chairman, Department of Agricultural Microbiology for providing necessary facilities and valuable suggestions. I would like to thanks to my teachers, Dr. Mohammad Saghir Khan and Dr. Almas Zaidi, Department of Agricultural Microbiology for their valuable suggestions and constant support. Deep appreciation, profound gratitude and also indebtedness go to all my teachers past and present, who enabled me to pursue higher ideas of life.

I am much indebted to Dr. Mujib Ahmad Ansari, Reader, Department of Civil Engineering, Zakir Husain College of Engineering and Technology, for providing valuable suggestions for statistical analysis.

I feel gratified to Prof. Farzana Aleem, the Dean, Faculty of Agricultural Sciences, AMU, Aligarh, for her support and cooperation during my research program.

I am thankful a lot to Shaba Apa under whose guidance I grew from juvenile stage to mature researcher during the period of eight years inculcating values indispensable to proliferate in life and I am thankful for her vigilant and useful much needed suggestions and practical help in conducting research experiments despite of her busy schedule. I express deep respect to Mr. Fazlur Rahman Khan who, with his ever-smiling face and amicable attitude, helped me to solve the technical problems upcoming during the research program. I would like pay my humble thanks to Ms. Rizwana. My heartfelt thanks to Sufi ji, Sultan and Sanjay for their cooperation.

I am also indebted to Ms. Darakshan Noor who issued me the required books and journals promptly without delay on my every humble request from M.Sc. to Ph. D. program.

My special thanks to all my obedient juniors especially Fahad, Ees and Samira for being nice, cooperative and for making a good atmosphere in the lab throughout my research. I learnt a lot of things from them that are vital in ups and downs of research arena.

I want to pay my special thanks to my senior Ikram Bhai for his moral support, encouragement and experimental help. I am grateful to my seniors Farah
Apa, Reshma Apa, Maryam Apa, Sajjad Bhai and Munees Bhai for their warm cooperation and help.

It is a pleasure to mention my classmates: Shahbaz, Mobeen, Owais, Ashish, Haneef, and Musheer for their undeniable support, cooperation and help. My special thanks to my Portuguese friends Raquel and Tania for making my trip to Braga a lifelong memorable moment.

I do thank University Grants Commission for providing Maulana Azad National Fellowship during this research work.

I am thankful to Sophisticated Analytical Instrument Facility (SAIF) IIT, Bombay, for carrying out FTIR and GC-MS analyses. I also want to extend my heartfelt thanks to Macrogen, Korea for 16S rDNA sequencing of bacteria.

Most importantly, I'd like to thank my family, without whom, I would never have been able to achieve anything. My parents are the reason that I made it. They never failed to make me believe that I could do anything - no matter how hard. They were ALWAYS there...even when I thought no one was. Both were there to support me everyday, and they will never know what a difference it made. Thanks for their unconditional love, I owe everything to them. Thanks to my sisters for their unequivocal support throughout, as always, for which my mere expression of thanks likewise does not suffice. I am also thankful to my nieces, Sarah and Fatimah for their innocent smile and tender hugs, which always refreshed me and gives me many reasons to smile.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Farhana Masood
