Chapter 1: REVIEW OF LITERATURE

1.1 Fungal infections
1.2 Fungal infections in the patients with Human Immunodeficiency Virus Infection
1.3 *Candida* species
1.4 Oropharyngeal candidiasis in HIV/AIDS patients
   1.4.1 Oropharyngeal candidiasis and the CD4+ T-cell count of the HIV/AIDS patients
   1.4.2 Impact of antiretroviral therapy
1.5 Vulvovaginal candidiasis
   1.5.1 Pathogenesis of vulvovaginal candidiasis
   1.5.2 Host factors
1.6 Global burden of diabetes
   1.6.1 Vulvovaginal candidiasis in diabetic patients
   1.6.2 Studies on vulvovaginal candidiasis from India
1.7 Neonatal candidiasis
   1.7.1 Overview
   1.7.2 Epidemiology
   1.7.3 Neonatal Candidiasis and *Candida* species
   1.7.4 Clinical Manifestations
1.8 Treatment of candidiasis
   1.8.1 Ergosterol biosynthesis inhibitors
   1.8.2 Azoles
   1.8.3 Antifungal drug resistance
      1.8.3.1 Clinical factors
      1.8.3.2 Molecular mechanisms of development of drug resistance
1.9 Combination antifungal therapy
1.10 Antifungal susceptibility testing
1.11 DNA Fingerprinting of fungal strains
   1.11.1 Features of an ideal DNA fingerprinting method
      1.11.1.1 Restriction fragment length polymorphism (RFLP)
1.11.1.2 Restriction fragment length polymorphisms with specific species DNA Fingerprinting Probes
1.11.1.3 Microsatellite typing by using oligonucleotide probes
1.11.1.4 Random amplification of polymorphic DNA (RAPD)
1.11.1.5 Multilocus enzyme electrophoresis (MLEE)

1.12 The computer assisted DENDRON

1.13 Virulence Factors of Candida species
   1.13.1 The glyoxylate cycle is required for the fungal virulence

1.14 Identification and diagnosis of the yeasts
   1.14.1 Criteria for Identification & diagnosis of yeasts
   1.15.1 Identification of Candida species by Randomly Amplified Polymorphic DNA

1.16 Objectives of the study

**Chapter 2: MATERIALS AND METHODS**

2.1 Materials
   2.1.1 Strains and plasmids

2.2 Culture media
   2.2.1 YEPD (Yeast Extract Peptone Dextrose)
   2.2.2 CMA (Corn Meal polysorbate Agar)
   2.2.3 TTC (Triphenyl tetrazolium chloride) SALT-SDA MEDIA
   2.2.4 SDA (Saboraud Dextrose Agar)
   2.2.5 Hi-Chrome Candida Differential Agar
   2.2.6 Luria Bertani Broth (LB)
   2.2.7 Drugs used in this study
   2.2.8 Preparation of RPMI-1640 MOPS media
   2.2.9 Buffers for agarose gel electrophoresis
   2.2.10 Mac. Farland Reagent

2.3 Methods
   2.3.1 Study Design
   2.3.2 Samples collection
   2.3.3 Sample processing

2.4 Yeast characterization
   2.4.1 Germ tube test
   2.4.2 Growth on Cornmeal (CMA)-Tween 80 agar
   2.4.3 Tetrazolium reduction test (TTC)
   2.4.4 Urease test
   2.4.5 Carbohydrate fermentation
   2.4.6 Carbohydrate assimilation
   2.4.7 Tween 80 opacity test and growth on 45° C.
   2.4.8 Colonies morphology (Microscopy)

2.5 Antifungal susceptibility testing by Clinical and Laboratory Standards Institute (CLSI) M27A-2 method.
   2.5.1 Spot test

2.6 Strains and plasmids
2.7 Extraction of genomic DNA from Candida species
2.7.1 DNA Fingerprinting of the Isolates by Southern hybridization
2.7.2 Bacterial miniprep DNA isolation
2.7.3 CARE-2 probe
2.7.4 Labeling of CARE-2 Probe
2.7.5 Computer programme to analyze DNA fingerprint patterns
2.7.6 Dendrogram and cluster analysis

2.8 Statistical analysis
2.9 Diagnostic Random Amplification Polymorphism DNA (RAPD)
2.9.1 The DNA thermal cycler was programmed with conditions
2.9.2 Primers used in this study

Chapter 3: INCIDENCE AND DISTRIBUTION OF CANDIDA ALBICANS AND NON-ALBICANS SPECIES AS ETIOLOGICAL AGENT OF VAGINITIS IN PREGNANT AND NON-PREGNANT WOMEN IN ALIAGRH, INDIA

3.1 Introduction
3.2 Experimental outline
3.3 Results
3.4 Discussion
3.5 Conclusions

Chapter 4: PREVALENCE OF CANDIDA SPECIES AND POTENTIAL RISK FACTORS FOR VULVOVAGINAL CANDIDIASIS IN ALIGARH, INDIA

4.1 Introduction
4.2 Experimental outline
4.3 Results
4.4 Discussion
4.5 Conclusions

Chapter 5: MOLECULAR EPIDEMIOLOGY OF INVASIVE CANDIDIASIS AND ANTIFUNGAL SUSCEPTIBILITIES OF CANDIDA SPP. TO ANTIFUNGAL AGENTS IN NEONATES: A NICU EXPERIENCE FROM NORTHERN INDIA

5.1 Introduction
5.2 Experimental outline
5.3 Results
5.4 Discussion
5.5 Conclusions
Chapter 6: MOLECULAR EPIDEMIOLOGY OF THE OCCURRENCE OF CANDIDA IN FULL TERM NEONATES AND THEIR MOTHERS: A CONCORDANCE STUDY

6.1 Introduction
6.2 Experimental outline
6.3 Results
6.4 Discussion
6.5 Conclusions

Chapter 7: MODE OF TRANSMISSION OF CANDIDA ALBICANS IN EXTREMELY LOW BIRTH WEIGHT (ELBW) INFANTS

7.1 Introduction
7.2 Experimental outline
7.3 Results
7.4 Discussion
7.5 Conclusions

OVERVIEW OF CONCLUSIONS
