Abstract:	1-22
CHAPTER I:	
Total synthesis of 2-substituted piperedines '<i>Bisnucleophilic Substitution</i>' as the synthetic tool for the ready access to some piperidine alkaloids (+)-coniine, (+)-β-conhydrine , (+)-8-ethylnorlobelol and (-)-8-<i>epi</i>-halosaline'	
Introduction	23-45
Present work	46-61
Experimental	62-83
References	84-89
Spectra	
CHAPTER II:	
Total synthesis of bioactive natural products: The first total Synthesis of (6<i>Z</i>,9<i>S</i>)-3,4-<i>trans</i>-9-hydroxy-3-methyldodec-<i>cis</i>-6-en-4-olide and (6<i>Z</i>)-3,4-<i>trans</i>-9-oxo-3-methyldodec-<i>cis</i>-6-en-4-olide γ-butyrolactones	
Introduction	90-97
Present work	98-106
Experimental	107-114
References	115-117
Spectra	
CHAPTER III:	
Diastereoselective multicomponent reactions using sugar-derived chiral isonitriles	
Introduction	118-134
Present work	135-142
Experimental	143-151
References	152-154
Spectra	
List of Publications	155-156
