ACKNOWLEDGEMENT

The work presented in this thesis would not have been possible without my close association with many people who were always there when I needed them the most. I take this opportunity to acknowledge them and extend my sincere gratitude for helping me make this Ph.D. thesis.

I would like to start with the person who made the biggest difference in my life, my mentor, Dr. J.P. Agrawal Sir, (Principal, JNIT-Jaipur) Supervisor in my research work. He has been there, in front of my eyes for last Four years, motivating and inspiring every bit of me towards new possibilities in life.

I express my heart-felt gratitude to Prof. Y.S. Sisodiya Sir, Joint Supervisor in my research work for his constant motivation and support during the course of my thesis.

My special words of thanks should also go to Dr. Vivek Sharma Sir, (Research Coordinator Jagannath University Jaipur), for always being so kind, helpful and motivating. His constant guidance, cooperation and support have always kept me going ahead.

I express my heart-felt gratitude to Dr. Pankaj Ashtankar Sir, Associate Professor ECE Dept. of Kavikulguru Institute of Technology and Science Ramtek Nagpur, for his constant motivation and support during the course of my thesis. His scientific inputs, personal helps and friendly nature has always made me feel at ease with him and I could always look back on him for any support during my course of Ph.D.

I acknowledge Prof. R. K. Malviya, Secretary Antenna Test & Measurement Society (ATMS) Ahmadabad, India for providing me the platform to measure the results of fabricated prototypes of my research work at ATMS conferences.

I can’t conclude without quoting the unconditional support offered by each one of my family members. The blessings of my parents and my in-laws always give me the courage to fight against any adverse situations. Without their moral support I can’t even think of completing a single stage of my research work.
The constant encouragement offered by my wife has made the path of research very smooth for me. Her extra effort for managing the home has given me ample time to spend in the research activities. I consider myself the luckiest in the world to have such a supportive family, standing behind me with their love and support.

Ashish Mathur
