Acknowledgement

Working as a Research Scholar in the Department of Botany was a magnificent as well as challenging experience to me. In all these years, many people were instrumental directly or indirectly in shaping up my academic career. It was hardly possible for me to thrive in my doctoral work without the precious support of these personalities. Here is a small tribute to all those people.

First of all, I express my deepest sense of gratitude and indebtedness to my supervisor Dr. Mansoor A. Siddiqui for suggesting the problem, valuable guidance, incessant encouragement, constructive criticism, expedient advice and care during the course of investigation and preparation of this thesis. His valuable suggestions added to the output of the research and inspired me to have a better grip over my research field. His adeptness, creative thoughts, perspicuous mind and words shall forever remain in my mind.

I am extremely thankful to Professor Arif Inam, Chairman, Department of Botany, Aligarh Muslim University, Aligarh for his kindness and providing necessary facilities to undertake this research work.

I extend my thanks and deep sense of gratitude to my learned teachers Prof. Q. A. Naqvi, Dr. Irshad Mahmood, Dr. Abrar A. Khan and Dr. Hisamuddin, Department of Botany, Aligarh Muslim University, Aligarh for their constant help and guidance. In fact, they had been a constant source of inspiration and encouragement for me.

In this hectic world we live in, we very rarely take time to complement people for a job well done. But I really want to say a special thanks to my seniors Dr. Mohmad Azhar Rather, Dr. M. S. Akhtar, Dr. Tariq A. Bhat and Mr. Shahid Ali as they cause happiness wherever they go.
I take this opportunity to acknowledge the help and cooperation rendered by my laboratory inmates Ms. Kavita Parihar and Ms. Bushra Rehman, who were always helpful and encouraging during the course of this investigation.

I express thanks to my friends and research colleagues in the department. Particularly to Shaharyar M. Afzal, Hamid Iqbal Tak, Abid Rafiq, Rose Rizvi, Shahina Parveen, Zeba Khan, Moin A. Khan, Hilal A. Bhat and Rafia for giving me a pleasant time when working together with them since I knew them in the Department of Botany.

I am also extremely grateful to my hall mates Imran K, Sameja, Tosif, Majaz, Nadeem, Ali, Riyaz, Arshad and Hussain for their help and support at any time, and solving many unsolvable problems. They are not just friends but more than that. “When nights are long and friends are few, I sit alone and think of you with a lovely heart and silent tears all I wish is you to be here because you are the full support which none can provide, they provide happiness like a bubble bath.”

Where would I be without my family? My parents deserve special mention for their inseparable support and prayers. My Father, Mr. Rais Ahmad, in the first place is the person who put the fundament my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother, Mrs. Rehana Khatoon, is the one who sincerely raised me with her caring and gently love.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

(Faheem Ahmad)
