

## LIST OF GRAPHS

Graph No.	Descriptions	Page No
4.1	Mean Comparison between pre-tests and post-tests of Control Group students with respect to Explosive Strength in Long Jump from stationary position.	213
4.2	Mean Comparison between Pre-tests and post-tests of Experimental Group -A students with respect to Explosive Strength in Long Jump from stationary position.	214
4.3	Mean Comparison between pre-tests and post-tests of Experimental Group - B students with respect to Explosive Strength in Long Jump from stationary position.	215
4.4	Mean Comparison between pre-tests and post-tests of Control Group students with respect to Speed-Strength in Shuttle Run.	216
4.5	Mean Comparison between pre-tests and post-tests of Experimental Group - A students with respect to Speed-Strength in Shuttle Run.	217
4.6	Mean Comparison between pre-tests and post-tests of Experimental Group - B students with respect to Speed-Strength in Shuttle Run.	218
4.7	Mean Comparison between pre-tests and post-tests of Control Group students with respect to Speed-Strength in 50 Meters Dash.	219
4.8	Mean Comparison between pre-tests and post-tests of Experimental Group - A students with respect to Speed-Strength in 50 Meters Dash.	221
4.9	Mean Comparison between pre-tests and post-tests of Experimental Group - B students with respect to Speed-Strength in 50 Meters Dash.	222

4.10	Mean Comparison between pre-tests and post-tests of Control Group students with respect to speed, explosive-strength and functional performance of Right Leg from Hop Steps with Right Leg in a given distance of 20 meters.	223
4.11	Mean Comparison between pre-tests and post-tests of Experimental Group - A students with respect to speed, explosive-strength and functional performance of Right Leg from Hop Steps with Right Leg in a given distance of 20 meters.	225
4.12	Mean Comparison between pre-tests and post-tests of Experimental Group -B students with respect to speed, explosive-strength and functional performance of Right Leg from Hop Steps with Right Leg in a given distance of 20 meters.	226
4.13	Mean Comparison between pre-tests and post-tests of Control Group students with respect to speed, explosive-strength and functional performance of Left Leg from Hop Steps with Left Leg in a given distance of 20 meters.	228
4.14	Mean Comparison between pre-tests and post-tests of Experimental Group - A students with respect to speed, explosive-strength and functional performance of Left Leg from Hop Steps with Left Leg in a given distance of 20 meters.	229
4.15	Mean Comparison between pre-tests and post-tests of Experimental Group - B students with respect to speed, explosive-strength and functional performance of Left Leg from Hop Steps with Left Leg in a given distance of 20 meters.	231

4.16	Mean Comparison between pre-tests and post-tests of Control Group students with respect to speed - endurance and strength of thigh and calf muscles from 800 Meters Run.	232
4.17	Mean Comparison between pre-tests and post-tests of Experimental Group-A students with respect to speed - endurance and strength of calf and thigh muscles from 800 Meters Run.	233
4.18	Mean Comparison between pre-tests and post-tests of Experimental Group-B students with respect to speed - endurance and strength of calf and thigh muscles from 800 Meters Run.	235
4.19	Mean Comparison of results of students based on their test groups i.e., Control Group, Experimental Group - A and Experimental Group - B with respect to Explosive Strength in Long Jump from stationary position.	236
4.20	Mean Comparison of results of students based on their test groups i.e., Control Group, Experimental Group - A and Experimental Group - B with respect to Speed-Strength in Shuttle Run.	238
4.21	Mean Comparison of results of students based on their test groups i.e., Control Group, Experimental Group - A and Experimental Group - B with respect to Speed-Strength in 50 Meters Dash.	239
4.22	Mean Comparison of results of students based on their test groups i.e., Control Group, Experimental Group - A and Experimental Group - B with respect to speed, explosive-strength and functional performance of Right Leg from Hop Steps with Right Leg in a given distance of 20 meters.	241

4.23	Mean Comparison of results of students based on their test groups i.e., Control Group, Experimental Group - A and Experimental Group - B with respect to speed, explosive-strength and functional performance of Left Leg from Hop Steps with Left Leg in a given distance of 20 meters.	243
4.24	Mean Comparison of results of students based on their test groups i.e., Control Group, Experimental Group - A and Experimental Group - B with respect to speed - endurance and strength of thigh and calf muscles from 800 Meters Run.	245
