ACKNOWLEDGEMENTS

In completing this research work on the "Environmental Management in Indian Fertiliser Industry", several people have helped me with their valuable contributions. It has indeed been a challenge to get into the core of the issues involved in the subject matter of the study and assimilate the facts. This has been possible only with the unstinted support and encouragement of several practitioners in the industry and academicians.

It is no easy task for me to thank all those who gave their valuable time in discussing and supplementing the data required for the work.

In the first place, I would like to thank my Supervising Guide, Dr.C.A. Francis, Professor, School of Management Studies, Cochin University of Science and Technology, for the valuable guidance and support given to me at every stage of the research study.

My sincere gratitude is due to Dr.Gorge Manalel, Reader, School of Management Studies, Cochin University of Science and Technology, who as the Doctoral Committee Member encouraged me in the work.

I also place on record my sincere gratitude to the Director and other Faculty and staff of the School of Management Studies, Cochin University of Science and Technology for the support extended to me in completing the study.

I am grateful to Dr.D.Rajasenan, Dean, Faculty of Social Sciences, Cochin University of Science and Technology, for the support rendered to me.

Several of my learned colleagues at The Fertilisers And Chemicals Travancore Ltd., Cochin, and other major fertiliser units in the country and some abroad also helped me in my work through their valuable suggestions and answering to my queries. I am most grateful to them all.

I also thank the Management of The Fertilisers And Chemicals Travancore Ltd., for allowing me to undertake the research work on the subject.

M.P.Sukumaran Nair
