CONTENTS

Preface .................................................. i-iv
Acknowledgement ........................................... v-vi
List of Tables & Figures .................................. vii-ix

Chapter-I: Concepts and Theories: Scientific Knowledge and Contemporary Sociological Theories ........................................... 1-45
- Definition of Science
- Characteristics of Scientific Knowledge
- Verification of Scientific Knowledge
- Dynamics in science
  - Karl Popper's Theory of Falsification
  - Kuhn's Theory of Normal and Revolutionary Science
  - Paul Feyerabend's Theory of Multiplicity
- Review of Literature (Emerging Trends in Social Studies of Science)
- Functionalist Perspective
- Marxist Perspective on Science
- Conflict Theory
- Interest Model
- Social Constructivist Perspective
- Studies in Indian Context
- The Present Study
- Conclusion

Chapter-II: Methodology ..................................... 46-66
- Problem of the Study
- Objectives of the Study
- Operational Definition of concepts
  - Normative Dimensions
  - Community life
  - Cultural Orientation
  - Conceptual framework
- Universe of the study and Rationale for the selection of NPL and I.I.Sc.
- Sampling Procedure
- Method of Study and Data Collection
- Period of Study
- Field work experience
- Scope and relevance of the study
- Conclusion
Chapter - III : Science, Culture and Nation: A Socio-Historical Perspective

- Cultural perspective on science
- Cultural ethos of China and Development of science
- Science and Civilization in the west.
- Scientific tradition and culture in India.
  - Methodology and epistemology in ancient India.
  - Indian Science Legacy.
  - Development of Modern Science under Colonial Rule.
  - Modern Science and Creation of National Identity
  - Development of Science in Independent India.
- Science in a National and International Context.
- Challenges of Scientists' Cultural Orientation: Science as a New Force of Imperialism.
- Conclusion

Chapter - IV: Community Life of Scientists: An Interface between Science and Society.

- Concept of Scientific Community
- General Background of Scientists
- Sources of Influence for Joining the Profession of Science
- Societal Perception of Scientists about their Works
- Perception of Scientists regarding their Research Organizations
- Selection of Research Themes
- Inter-Personal Relationship among Scientists and Socialization of Neo-Scientists
- Production of Scientific Knowledge
- Inter-Disciplinary Approach in Scientific Research
- Research Network and Changing Pattern of interaction
- Conclusion

CHAPTER V: Normative Dimensions and Practice of Science

- Normative Dimensions of Science
- Scientific norms and their Adherence Pattern
- Norm of Universalism and their Implication for Practice of Science
- Norm of Disinterestedness and Disputes Over Priority.
- Norm of Communality in the Context of Industrial and Classified Research
- Norm of Organized Scepticism: Problem of Authority and Lack of Adequate Response
- Role of different methodological practices
- Practising of Norms: Complexities and Ambiguities
- Conclusion
