ACKNOWLEDGEMENT

The author is extremely thankful to his beloved guide, Dr. K. Subramanian, Professor and Head of Civil Engineering, Coimbatore Institute of Technology, Coimbatore, for suggesting this topic and his remarkable guidance and assistance thought this work.

He expressed his deep gratitude to Dr. R. Prabakar, Principal, Coimbatore Institute of Technology, Coimbatore, for granting him permission and providing facilities for carrying out this work. He deems it a pleasure to place it on record his immense gratitude to Dr. E.B. Perumal Pillai, Assistant Professor, Coimbatore Institute of Technology, Coimbatore, and Dr. V.G. Srisanthis, who is in-charge of Structural Engineering Laboratory, Coimbatore Institute of Technology, Coimbatore for their deep involvement in this work and their kind suggestions.

The author is immensely grateful to Dr. A.R. Santhakumar, Professor Emeritus, Indian Institute of Technology-Madras, Chennai, for his thought-provoking suggestions, critical comments and his uniform benevolence. The Management of Coimbatore Institute of Technology, Coimbatore is to be particularly thanked for providing all the facilities and otherwise, in carrying out and completing this work. The author is thankful to his doctoral committee members Dr. K. Jagadeesan and Dr. S.C. Natesan for their deep involvement in this work and their kind suggestions.

And last, the ineffable understanding, patience, love and support shown by his father A.Suyamburaja (Late), mother Smt.C-Packiam, wife G.Puvaneswari and daughter A.Sowmiya, during those busy days of research during which he scarcely found time to bestow any attention to them, are most gratefully inscribed in his heart.

SUYAMBURAJA ARULSELVAN
