**Chapter 1**

1.1 Colinearity of organization and functional domains of *Hox* genes along a-p body axis 3
1.2 Homeotic mutants of *Drosophila melanogaster* 4
1.3 Conservation of organization and expression of *Hox* genes 5
1.4 Origin of *Hox* and *ParaHox* clusters 7
1.5 Regulation of *Hox* genes by many inputs 9
1.6 The *Drosophila* life cycle 20

**Chapter 2**

2.1 Vector maps 24
2.2 Transgenic fly 27

**Chapter 3**

3.1 Assays for boundary elements 38
3.2 Map of *Evx2-Hoxd13* region of HoxD complex 46
3.3 Schematic representation of boundary assay vectors 46
3.4 *Evx2-Hoxd13* fragment acting as enhancer blocker 47
3.5 *Evx2-Hoxd13* fragment acting as enhancer blocker 47
3.6 Confirmation of *Evx2-Hoxd13* fragments as enhancer blockers 47
3.7 *Evx2-Hoxd13* boundary element in RW+ vector 47
3.8 Enhancer blocking assay in human erythroleukemic cell line 48
3.9 Effect of *Trl* GAGA mutation on *Evx2-Hoxd13* boundary element 49
3.10A Colocalisation of TRL GAGA with *Evx2-Hoxd13* boundary element of transgenic flies 49
3.10B TRL does not colocalize with the boundary line after excision 49

**Chapter 4**

4.1 Assays for detecting *Polycomb* Response Elements in *Drosophila* 57
4.2 Model for multistep mechanism of *trxG* and *PcG* proteins on PREs 58
4.3 Location of silencing region of mouse HoxD complex
4.4 Element from mouse HoxD complex during showing repressor activity in *Drosophila*
4.5 Absence of pairing dependent silencing of repressor element from mouse HoxD complex
4.6 Effects of PcG mutations on mouse repressor element
4.7 Cumulative effect of PcG mutations on mouse repressor element
4.8 Effect of \textit{trxG} mutations on mouse repressor element
4.9 Effect of \textit{Trl} GAGA mutation on mouse repressor element
4.10 Effect of \textit{Su(var)} mutations on mouse repressor element
4.11 Colocalisation of PcGFP with mouse PRE on polytene chromosomes of transgenic flies
4.12 Colocalisation of PC with mouse PRE on polytene chromosomes of transgenic flies
4.13 Colocalisation of PC with mouse PRE on polytene chromosomes of three different insertions
4.14 Colocalisation of PSC with mouse PRE on polytene chromosomes of transgenic flies
4.15 Colocalisation of TRL with mouse PRE on polytene chromosomes of transgenic flies
4.16 Overlapping fragments of mouse PRE
4.17 Repressor activity of PRE is released from repression once the element is excised from the transgenic lines
4.18 Effect of mutations on full-length mouse PRE in Casper vector
4.19 Repressor activity of PRE fragments after excision
4.20 Effect of mutations on fragment I
4.21 Effect of mutations on fragment II
4.22 Effect of mutations on fragment III
4.23 ImmunoFISH with PC on mouse PRE fragments of Polytenes chromosomes
4.24 ImmunoFISH with TRL on mouse PRE fragments of Polytenes chromosomes
4.25 Sequence analysis of mouse PRE
4.26 A model for colinear expression of Hox genes during development
