Acknowledgements

At first I want to acknowledge Shiva for his constant motivation and encouragement in perusing my experimental study. He is an outstanding experimentalist and getting the opportunity to work with him, I have learnt a lot in my PhD period. Creativity in designing an experiment, quickly checking the feasibility of the experiment and completing it are few of the things that I have learnt from him. He has not only taken care in developing my experimental skills but also taken care in developing my scientific presentation.

I am extremely thankful to Yashodhan, Madan, and Raghu for their constant encouragement. Discussions with them were always a moral boost for me. They were very supportive academically and non-academically throughout my research life. I also want to thank Jitu, Vijay Raghavan and Sriram from NCBS for many useful discussions.

My stay at RRI has been a wonderful experience in the company of Abhishek Dhar, Madhavan, Bala, Ranjini, Arun Roy, Sumati, Shib, Sam and Udayshankar both scientifically and otherwise.

I want to thank my entire present and past lab-mates- Abhishek, Aprotim, Anne, Bala, Bidisha, Deepak, Feroz, Gautam, Indu, Jaffar, Nisha, Pady, Ramya, Roopa, Sandeep, Shefali, Shova, Soumya, Venky and Viji. In different time point I have learnt different things from them as well as spent some nice time during my research life. I would also like to thank Jyoti, Loveleen and Nagapriya.

Friends are also a great part of my life. I want to thank Chandreyee, Sudipto, Sutirtha, Abhishek Chaudhuri, Debashish Chaudhuri, Tridib, Ritayan, Shreyashi, Dibyendu, Kripa, Arya, Arif, Antara, Abhijit, Radhakrishna, ..... all my batch-mates, seniors and juniors. I also want to thank Basudha, Priyanka, Debanjan, Abu, Albert, Hyder ..... from NCBS for many memorable moments. Sajal and Brindaban gave me memorable company from my University days.
The environment at both RRI and NCBS is ideal for science. I thank the administrative staff of both these institutes for maintaining such collaborative environment. I also thank the supporting staff of these institutes for maintaining the common instrument facilities and the workshop people who were really helpful in developing different modules necessary for my experiments. The libraries in both the places have a vast collection of books and journals. These well maintained libraries were very useful during my research activity.

I want to thank teachers from my school and university days. I want to thank my university friends like Atikurda, Gautam, Shirshendu, Arundhati,… for their friendship as well as scientific discussion. My friends Santanu, Pallab, Saikat, Dhruba, Nilanjan, Pralay, Soumya, ….. always encouraged me throughout my research period.

My relatives and family were always encouraging for pursuing my research. My mother and sister have been a constant source of encouragement and without their support it would not have been possible to pursue my scientific endeavor.
