</table>
Data and Resultsof t-test for the Mean Scores of Post Test I (Objective wise and Total Scores) Between Experimental Group and Control Group (Total Sample, Boys and Girls)

Data and Resultsof t-test for the Mean Scores of Post Test I (Objective wise and Total Scores) Between Experimental Group II and Control Group (Total Sample, Boys and Girls)

Data and Resultsof t-test for the Mean Retention Scores (Post Test II – Pre Test) Between Experimental Group I and Control Group (Total Sample, Boys and Girls)

Data and Resultsof t-test for the Mean Retention Scores (Post Test II – Pre Test) between Experimental Group II and Control Group (Total Sample, Boys and Girls)

Summary of the Resultsof Mean Difference Analysis for Experimental Group I and Control Group in Achievement in Mathematical Skills

Summary of the Resultsof Mean Difference Analysis for Experimental Group II and Control Group in Achievement in Mathematical Skills

Data and Resultsof Two-way ANOVA of Achievement in Mathematical Skills Post-Test I (Objective wise and Total score) by Methods of Teaching by Previous Knowledge of Subject Matter for Total Sample, Boys and Girls

Data and Resultsof Test of Significant Difference Between Means of Achievement in Mathematical Skills Post Test I (Objective wise and Total score) of the Two Groups Based on Methods of Teaching for Total Sample, Boys and Girls

Data and Resultsof Two-way ANOVA of Achievement in Mathematical Skills Post-Test I (Objective wise and Total score) by Methods of Teaching by Non Verbal Intelligence for Total Sample, Boys and Girls

Data and Resultsof Test of Significant Difference Between Means of Achievement in Mathematical Skills Post Test I (Objective wise and Total score) of the Two Groups Based on Methods of Teaching for Total Sample, Boys and Girls

Data and Resultsof Two-way ANOVA of Achievement in Mathematical Skills Post-Test I (Objective wise and Total score) by Methods of Teaching by Numerical Ability for Total Sample, Boys and Girls
4.18 Data and Results of Test of Significant Difference Between Means of Achievement in Mathematical Skills Post Test I (Objective wise and Total score) of the Two Groups Based on Methods of Teaching for Total Sample, Boys and Girls

4.19 Summary of F-values of the Main Effect and Interaction Effects of Methods of Teaching, Previous Knowledge of Subject Matter, Non-Verbal Intelligence and Numerical Ability on Achievement in Mathematical Skills Post Test I (Objective wise and Total Score) for Total sample, Boys and Girls

4.20 Data and Results of Two-way ANOVA of Achievement in Mathematical Skills Post-Test II (Objective wise and Total score) by Methods of Teaching by Previous Knowledge of Subject Matter for Total Sample, Boys and Girls

4.21 Data and Results of Test of Significant Difference Between Means of Achievement in Mathematical Skills Post Test II (Objective wise and Total score) of the Two Groups of Sample Based on Methods of Teaching for Total Sample, Boys and Girls

4.22 Data and Results of Two-way ANOVA of Achievement in Mathematical Skills Post-Test II (Objective wise and Total score) by Methods of Teaching by Non Verbal Intelligence for Total Sample, Boys and Girls

4.23 Data and Results of Test of Significant Difference Between Means of Achievement in Mathematical Skills Post Test II (Objective wise and Total score) of the Two Groups of Sample Based on Methods of Teaching for Total Sample, Boys and Girls

4.24 Data and Results of Two-way ANOVA of Achievement in Mathematical Skills Post-Test II (Objective wise and Total score) by Methods of Teaching by Numerical Ability for Total Sample, Boys and Girls

4.25 Data and Results of Test of Significant Difference Between Means of Achievement in Mathematical Skills Post Test II (Objective wise and Total score) of the Two Groups of Sample Based on Methods of Teaching for Total Sample, Boys and Girls
4.26 Summary of F-values of the Main Effect and Interaction Effects of Methods of Teaching in combination with Previous Knowledge of Subject Matter, Non-Verbal Intelligence and Numerical Ability (one by one) on Achievement in Mathematical Skills Post Test II (Objective wise and Total Score) for Total sample, Boys and Girls

4.27 Summary of the Significance of F-values Obtained for Main Effect and Interaction Effect of Methods of Teaching, Previous Knowledge of Study Materials, Non-Verbal Intelligence and Numerical Ability on Achievement in Mathematical Skills Post Test I for Total Sample, Boys and Girls

4.28 Summary of the Significance of F-values Obtained for Main Effect and Interaction Effect of Methods of Teaching, Previous Knowledge of Study Materials, Non-Verbal Intelligence and Numerical Ability on Achievement in Mathematical Skills Post Test II for Total Sample, Boys and Girls

4.29 Summary of Two-way Factorial ANCOVA for Achievement in Mathematical Post Test I (Objective wise and Total Score) – Pre Test Scores as Covariate for Total Sample

4.30 Data and Results of Test of Significant difference Between Adjusted Means of Achievement in Mathematical Skills Post-Test I (Objective wise and Total Score) for Total Sample – Previous knowledge of Subject Matter as Covariate

4.31 Summary of Two-way Factorial ANCOVA for Achievement in Mathematical Skills Test I (Objective wise and Total Score) – Non-Verbal Intelligence as Covariate for Total Sample

4.32 Data and Results of Test of Significance difference Between Adjusted Means of Achievement in Mathematical Skills Post-Test I (Objective wise and Total Score) for Total Sample – Non Verbal Intelligence as Covariate

4.33 Summary of Two-way Factorial ANCOVA for Achievement in Mathematical Skills Post Test I (Objective wise and Total Score) Numerical Ability as Covariate for Total Sample
4.34 Data and Results of Test of Significant difference Between Adjusted Means Of Achievement in Mathematical Skills Post-Test I (Objective wise and Total Score) for Total Sample – Numerical Ability as Covariate

4.35 Summary of Two-way Factorial ANCOVA for Achievement in Mathematical Skills Post Test II (Objective wise and Total Score) Previous Knowledge of Subject Matter as Covariate for Total Sample

4.36 Data and Results of Test of Significant difference Between Adjusted Means Of Achievement in Mathematical Skills Post-Test II (Objective wise and Total Score) for Total Sample – Previous Knowledge of Subject Matter as Covariate

4.37 Summary of Two-way Factorial ANCOVA for Achievement in Mathematical Skills Post Test II (Objective wise and Total Score) Numerical Intelligence as Covariate for Total Sample

4.38 Data and Results of Test of Significant difference Between Adjusted Means Of Achievement in Mathematical Skills Post-Test I (Objective wise and Total Score) for Total Sample – Non-verbal Intelligence as Covariate

4.39 Summary of Two-way Factorial ANCOVA for Achievement in Mathematical Skills Post Test II (Objective wise and Total Score) Numerical Ability as Covariate for Total Sample

4.40 Data and Results of Test of Significant difference Between Adjusted Means of Achievement in Mathematical Skills Post-Test I (Objective wise and Total Score) for Total Sample – Numerical Ability as Covariate

4.41 Summary of 2x2 Factorial ANCOVA for Post-Test I and Post-Test II for Total Sample

4.42 Summary of Post-hoc Comparison of Test of Significance of Difference Between Adjusted Means of Achievement in Mathematical Skills Post-Test I and Post-Test II
