LIST OF FIGURES

Figure No. | Instructional and Nurturent Effects of Direct Instruction Model | Page No.
--- | --- | ---
2-1 | Instructional and Nurturent Effects of Direct Instruction Model | 158

4-1 | Interaction Effect (Methods of Teaching and Previous Knowledge of Subject Matter) on Achievement in Mathematical Skills Post Test I for Total Sample | 159

4-2 | Interaction Effect (Methods of Teaching and Previous Knowledge of Subject Matter) on Achievement in Mathematical Skills Post Test I for Boys | 160

4-3 | Interaction Effect (Methods of Teaching and Previous Knowledge of Subject Matter) on Achievement in Mathematical Skills Post Test I for Girls | 161

4-4 | Interaction Effect (Methods of Teaching and Non-Verbal Intelligence) on Achievement in Mathematical Skills Post Test I for Total Sample | 162

4-5 | Interaction Effect (Methods of Teaching and Non-Verbal Intelligence) on Achievement in Mathematical Skills Post Test I for Boys | 163

4-6 | Interaction Effect (Methods of Teaching and Non-Verbal Intelligence) on Achievement in Mathematical Skills Post Test I for Girls | 164

4-7 | Interaction Effect (Methods of Teaching and Numerical Ability) on Achievement in Mathematical Skills Post Test I for Total Sample, Boys and Girls | 165

4-8 | Interaction Effect (Methods of Teaching and Previous Knowledge of Subject Matter) on Achievement in Mathematical Skills Post Test II for Total Sample | 166

4-9 | Interaction Effect (Methods of Teaching and Previous Knowledge of Subject Matter) on Achievement in Mathematical Skills Post Test II for Boys | 167

4-10 | Interaction Effect (Methods of Teaching and Previous Knowledge of Subject Matter) on Achievement in Mathematical Skills Post Test II for Girls | 168
