# CONTENTS

**CHAPTER I: Introduction**

1.1 An introduction to demographic profile and family health 1
1.2 Chhattisgarh State: An overview 5
1.3 Importance of the study 8
1.4 Objectives 9
1.5 Hypothesis 10
1.6 Data sources 10
1.7 Research design 11
1.8 Statistical techniques 12

**CHAPTER II: Review of Literature**

2.1 Demographic profile 14
2.2 Family health status 40

**CHAPTER III: Demographic Profile of Chhattisgarh:**

Levels and Trends 59-87

3.1 Population totals and progressive population growth 59
3.2 Decadal and annual exponential population growth rates 62
3.3 Decades classified by the rating of average annual population growth 64
3.4 Semi-centennial and centennial trends 66
3.5 Decennial population growth by districts 67
3.6 Annual population growth by districts 70
3.7 Classification of districts by the rating of average annual population growth 73
3.8 Sex ratio 74
3.9 Density of population 78
3.10 Birth rates, death rates and natural growth rates 81

**CHAPTER IV: Family Health Status of Chhattisgarh:**

Levels and Trends 88-122

4.1 Fertility 88
4.2 Fertility preferences 93
4.3 Family planning 99
4.4 Maternal health 104
4.5 Child health 108
4.6 Nutritional status of children 115
4.7 Anaemia 119
CHAPTER V: Qualitative Survey  123-133
5.1  Housing characteristics  123
5.2  Knowledge and attitudes  126

CHAPTER VI: Hypothesis Testing and SWOT Analysis  134-149
6.1  Testing of hypotheses  134
6.2  SWOT analysis  145

CHAPTER VII: Summary, Conclusions and Suggestions  150-158
7.1  Summary and conclusions  150
7.2  Suggestions  156

</tbody>
</table>
4.4 Percentage of currently married women age 15-49 who want no more children by number of living children. 94

4.5 Percent distribution of ever married women age 15-49 by the opinion of ideal number of children and mean ideal number of children. 96

4.6 Percentage of ever married women age 15-49 by their Sex preference. 98

4.7 Percent currently married women who know about any modern contraceptive methods. 100

4.8 Percent distribution of currently married women by the use of contraceptive method. 102

4.9 Percentage of last births in the past three years by ANC visits. 105

4.10 Percentage of last births in the past three years by delivery care. 107

4.11 Percentage of children age 12-23 months who received specific vaccines at any time before the survey. 109

4.12 Early childhood mortality rates for five years preceding the survey. 112

4.13 Infant mortality rate in Chhattisgarh, India and Kerala: 1999-2010 114

4.14 Percentage of children under age three years classified as malnourished according to the three anthropometric indices of nutritional status. 116

4.15 Percentage of children age 6-35 months born to ever married women classified as having anaemia. 119

4.16 Percentage of ever married women age 15-49 years classified with anaemia. 121

5.1 Percent distribution of households by housing characteristics, Chhattisgarh: 2005-06 vis-à-vis 2011 (Rural). 124
5.2 Women’s knowledge and attitude indicators on demographic variables, Chhattisgarh: 2005-06 vis-à-vis 2011 (Rural).

5.3 Women’s knowledge and attitude indicators on family health, Chhattisgarh: 2005-06 vis-à-vis 2011 (Rural).

6.1 Odds Ratios, their p-value and 95% Confidence Interval examining the association between the population variable and time period in Chhattisgarh

6.2 Odds Ratios, their p-value and 95% Confidence Interval examining the association between the demographic variable and time period in Chhattisgarh

6.3 Odds Ratios, their p-value and 95% Confidence Interval examining the association between the families health variable and time period in Chhattisgarh

6.4 Birth rates, death rates and infant mortality rates of Chhattisgarh, 1999-2010.
