ACKNOWLEDGEMENT

I would first of all like to thank Almighty for being by my side always and giving me the spiritual strength to face and overcome all the obstacles that came on my way.

I am thankful to my thesis supervisor Dr. A.J. Rachel for giving me the opportunity to work on a challenging aspect of modern biology and letting me explore the exciting field of proteomics.

I am extremely grateful to my thesis co-supervisor Prof. Lalji Singh for his support during critical phase of my thesis. I would also like to thank him as director of CCMB for all the central facilities and for maintaining high standards of working ambience at CCMB.

The mutant, Yq-del mice was a kind gift from Prof. P. Burgoyne and is sincerely acknowledged.

I express my gratitude to Dr. V.M. Dhople for his timely and crucial expert help. I also thank him for being my mentor in protein sequencing.

I am extremely grateful to the members of animal house facility of CCMB. I thank Mr. Dwarknath and Dr. Mahesh for their cooperation in maintaining the animals used in the study.

I would like to thank Mr. Swami from the proteomics facility for helping me with the N-terminal sequencing.

I am extremely grateful to Kasturi, Narsimha and Madhuraksha for teaching me 2D PAGE.

I am thankful to Dr. Archana and Venkatesh from Dr. Sivaji's group for helping me in the CASA work. I am thankful to Dr. Sivaji for permitting me to use CASA.

I would like to thank Mrs. Nandini for her expert help and patience during Confocal microscopy.

I am thankful to Mrs. Meher Sultana for synthesizing such good quality primers that they are still working fine...

I am grateful to Dr. Ramrup Sarkar for helping with the statistical analysis.

Thanks to members of the fine chemicals, instrumentation group and digital imaging facility.

A special thanks needs to be mentioned for Dr. Amritha Suresh who patiently taught me the little nuances of molecular biology.

I would like to thank all past and present lab members as well as members of west wing 3rd floor for their company and support. I am extremely grateful to the technical support rendered by Suryanarayanaji, Hanif, Vishwanath, Raju and Bhaskar. It was their constant support that made life in the lab easy.

I am grateful to my hatch mate Tirumal and members Dr. Mohan Rao's group for helping in many of my protein related work. They have generously shared their protocols and apparatuses.

My stay in CCMB was made pleasant due to the company of my friends. Shoaib and Tirumal who were always there to patiently listen to all my work related troubles and woes, and suggested ways to come out of them. Ganesh, Pallavi, Pravin, Ram, Sapna, Sumit, Vasanthi and Usha were there for me.
always. Thanks to Shweta and her family who made me feel at home, and always filled up for the absence of my own family in Hyderabad.

Finally, .... my family, I am indebted to them for their unconditional love, support and care. They have infused strength and courage to sail through all these years and have kept my spirits high during difficult times.

Financial support from CSIR during my tenure is duly acknowledged.
