I am deeply indebted to Joseph Samuel (Sam) for his guidance and constant encouragement. I am grateful to him for his enormous patience during the entire course of this work. He has been a great teacher all along with his unique way of explaining scientific ideas and I benefited immensely from his constructive criticisms and suggestions. It was also great to know Sam as a person during some very precious moments of discussion with him. This helped me to develop an overall scientific attitude and also helped me for an overall cognitive development. He has been amicable and extremely helpful in both academic and non-academic issues.

I am very much thankful to Sumati Surya for many useful discussions and valuable suggestions. I thank Shiv Sethi who has always been very friendly and I learned many things from him through discussions during the course of my stay here at RRI.

I thank Supurna Sinha for many useful discussions and suggestions. Time and again she gave me various important references and rare lecture notes on interesting and important academic topics.

I thank Madhavan Varadarajan, Damien H. Cho, Bala Iyer, C. S. Shukre and Sukanya Sinha for various useful discussions in the General Relativity Informal Meeting (GRIM).

I also thank Abhishek Dhar for his help regarding my numerical studies of heat type equations.

I thank Ravi Subrahmanyan, the Director of RRI for helping me out in many official matters.

The untimely demise of my colleague Javed Ahmad was a huge loss of a great friend. I still remember my stay at HRI for about a year where Javed and I were learning the techniques of geometry and physics. Time and again he helped me understand various concepts. He was an extremely sincere and hard working person and his death is a loss at a personal level.
My stay at HRI for about a year was a great time when I learned various useful things. I would like to thank all my friends at HRI.

I am thankful to Manjunath and Radhakrishna for their help.

I thank Mahadeva for his help.

I am extremely thankful to the library, computer, canteen and administrative staff at RRI who have been extremely helpful all the time.

I thank K. Krishnama Raju, the administrative officer at RRI, for his cheerful help on various occasions.

I thank Marisa D’Silva and K. Radha for their help.

I thank my parents and my grandmother for their constant support and inspiration. I thank Kouli for her constant support.

I am deeply indebted to the people of India for supporting all the academic and non-academic facilities and expenses that I had been enjoying during the course of my employment as a research fellow at RRI.

During the long course of my stay at RRI life has presented itself with a variety of colours, raising and lowering its indices every now and then. Overall it has been a wonderful stay here and the whole PhD programme, in addition to increasing my knowledge in my special field of interest, has also been an excellent process of getting educated about life in general and I thoroughly enjoyed the whole process.
