Acknowledgement

On the successful completion of this PhD thesis, I wish to pen down the names of all those people who have helped me during this journey, professionally or otherwise. First and foremost, I wish to express my gratitude to my mentor Dr Anand Ranganathan for his supervision, advice, and guidance since the very early stage of this research work. He has always been very supportive and encouraging, even during the darkest hours of my PhD days. He was actively involved in each and every aspect of all the experiments, guiding me, correcting my mistakes, providing brilliant ideas whenever I got stuck. Besides being a good scientist, he is equally popular among his colleagues and student community for his amicable nature and good sense of humor. I feel privileged to have worked under his supervision.

I thank Dr Navin Khanna and Dr Swaminathan for their valuable suggestions and support whenever sought for. I wish to thank Dr Natarajan for critically reading the manuscript and his valuable suggestions during this study.

I extend my sincere thanks to Prof V S Chauhan, Director, for providing excellent research facilities at ICGEB.

I gratefully acknowledge the help and support provided by Dr Y Singh, IGIB. I sincerely thank him for his valuable suggestions and guidance whenever needed and also, for providing unlimited freedom and resources during my stay in his lab. I thank Dr Natarajan, SLS, JNU and Dr Soma Sarkar, DIPAS for providing microarray scanning facilities. I also convey my sincere thanks to Prof Joyoti Basu, Bose Institute, India and Prof. J Belisle, Colorado State University, USA for providing plasmids used in this study. I gratefully acknowledge PFGRC, USA for providing the microarray slides.

I wish to extend my thanks to my senior colleagues, Alka, Saima, Suchita, Menaka, Smitha, and Behzad who introduced me to many of the tools and techniques of molecular biology. I especially thank Saima (Sakeena) and Rajendra (Mr Metaphysics) for being a ‘joyous’ help, even from miles away.
I sincerely thank the 'duo', Geeta and Anjani for their help and support during this study. Geeta, being a friend and a colleague, was always there whenever I needed him. I am indebted to Anjani for all those delicious lunches and dinners (especially, mutter mushroom) she would cook for us on weekends.

Sincere thanks to my colleagues, Megha, Swetha, Sushil, Kuhulika, Anamika and Sachin for their help whenever needed. I thank Megha for her help during this study and for carefully checking the manuscript (though she never got the Eclairs she was promised- one per mistake). I would like to thank all the present and past members of RGP group: Gaurav, Talha, Poornima, Anil, Shuchi, Nimrata, Arvind, Ashiya, Nisha, Meena, Upasana, and Mani. Special thanks to Rajen for his help with fluorescent microscope. My buddy, Chandra and Tanu deserve a special mention as with them around it was always difficult to keep laughter suppressed, neither can I miss the presence of Satish (Baba Aamdev). I also thank Tanu for arranging much needed research articles, almost instantly.

I thank Joginder for arranging everything that I ever needed during my research work. Ask him where a particular chemical is and he would disappear behind the store room door to come out with it in no time.

I express my sincere thanks to Aseem and Deepti for their help during TEM and macrophage infection studies, respectively.

I sincerely thank all my friends and colleagues at IGIB: Ajeet, Jameel, Gunjan, Richa, Santosh, Abid, Andaleeb, Ashwani, Preetida, Abhishek, and Upendra. I specially thank Ajeet and Jameel for their help and support during microarray experiments. I still remember the long hours spent with Jameel while analyzing the microarray data and thank him for his patience and untiring efforts. I also thank him for taking me to the never-seen-before streets in Purani Dilli for yummy chicken changhezi and khajoor Shake.

I acknowledge Dr Swati, DIPAS and Dr Rana Pratap, SLS, JNU for their help during microarray scanning.
I had the pleasure of having great friends at ICGEB: Prashant, Alam, Meha, Kalyan, Deepti, Viren, Subhasish, Grace, Sumona, Aseem, Hafiz, Namita, and Shashank. I can never forget the good time I spent with these people at ICGEB. The innumerable chats in corridors, lobby, across the table in cafeteria; occasional booze parties on the guesthouse terrace; movies; trips to Shimla, Nainital, Suraj Kund, and Badkal were the times to relish and realize the importance of being together. I thank Prashant for unlimited supply of beer, Meha for so many things (but above all for keeping us all together), Alam for keeping the room no. 10 ready for weekend parties (and cleaning the mess afterwards), Kalyan for excellent software support, Viren for tea/coffee breaks, and Deepti for all those hilarious discussions. Also, the time I spent with Yukti, Pavanish, Suraj, Siddharth, and Parveen would be cherished forever.

I take this opportunity to thank and acknowledge all my friends at UDSC: Satish, Jyotirmoy, Subhankar, Aman, Pinky, Geetanjali, Shahi (Ji), Manish, Rajiv, Paritosh, Naveen, Kasturi, and Vasudha. I specially thank Satish for his unconditional help and support whenever needed. I thank him for being ready for any kind of help (24X7). I thank Jyotirmoy for all those movies, drinks, and Sunday morning noodles (and of course for his life changing “advice”), Subhankar for musical and poetical discussions (and for all the Loshe bai-bai), Aman for always being there whenever needed, Pinky for always reminding me how intelligent I am (ಠ_ಠ), and Geetanjali for sending delicious chocolates. I thank Kasturi and Vasudha for those refreshing gmail chattings. The time spent with you guys would be cherished forever.

I would also like to thank Parul, Shweta, Shikha, Ram, Joy, and Camby for their help and support.

The financial support provided by CSIR, India in the form of JRF and SRF is duly acknowledged.

Above and beyond all, I would like to thank my parents for their endless love, encouragement, patience and support. Special thanks to my younger brother for his constant support and for taking up the responsibilities that were essentially mine. I thank my sisters for always being there.
