Acknowledgement

It is by the grace of the ALMIGHTY, my research work has ultimately transformed itself to the Thesis form and is waiting to be rewarded for distinction. It was a long journey, and is coming true with the blessings of mentors, well wishers and colleagues.

I am highly indebted to my research Supervisor, Prof. G. L. Mundhara, Head, School of Studies in Chemistry, Pt. Ravishankar Shukla University, Raipur (C.G.), India, who has painstakingly guided me for the completion of the Thesis work. I am also indebted to my Co-Supervisor, Dr. J. K. Sircar, Scientist E-II, Analytical Chemistry Centre, National Metallurgical Laboratory, Jamshedpur (Jharkhand), India, for introducing me to the subject of Voltammetry and Geoaccumulation Indexing. He also assisted me to familiarize the topology of the study area. Both of them left no stone unturned for introducing relevant knowledge required in the Thesis. It gives me immense pleasure and pride to remember them gratefully. They have burnt the midnight oil so that, my work should see the first charming rays of the dawn.

I am very thankful to Prof. S. P. Mehrotra, Director, National Metallurgical Laboratory, Jamshedpur, who extended every help to carry out this work. It was only due to him the National Metallurgical Laboratory could be established and equipped with many advanced and sophisticated instruments and modern electronic library facility, that helped me enrich the database of the Thesis.

I express my sincere thanks to Mr. K. K. Gupta, Deputy Director & Head, Analytical Chemistry Centre, National Metallurgical Laboratory, Jamshedpur, who always provided conducive atmosphere for the research work. I would also
like to extend my heartfelt sincere thanks to Dr. S. Chakravarty, Dr. J. Konar and all other colleagues in the Analytical Chemistry Centre. I would also like to express my sincere thanks to the supporting and secretarial staff of the centre, especially Mr. A.K. Sumbroy, for their good co-operation to carry out this research work.

I will with a sense of gratitude to record the help of Dr. M. K. Deb, Reader and all the faculty members from the SOS in Chemistry, Pt. Ravishankar Shukla University, Raipur (C.G.) for their constant inspiration. I am also cordially indebted to the secretarial staff of the department for extending their prompt administrative and other help in the University.

Last but not least, I would be failing in my duty if I forget to express my sincere thanks to my wife Shilpy and my little son Aditya. She remained always with patience in listening my problems and encouraged me at time of discouragement, during the entire tenure of the research project. She took every care so that, neither my son nor myself ever missed each other during this tiring journey of my academic pursuit.

The entire presentation of the work has been composed and printed by me, using the expertise of Mr. Yogesh Sharma, Computer facilities of the department and that of the staff of Shree Maa Kami Associates, Goal Chowk, Rohiniparam, Raipur. I am thankful of them. However, I do not absolve myself of any mistake in the text of the Thesis, but I would like to state that “To err is human and to forgive it is humanity”.

Place: Raipur.
Date: 12th Dec., 2005.

A.K. Upadhyay
(Technical Assistant, Analytical Chemistry Centre, National Metallurgical Laboratory, Jamshedpur, Jharkhand, India)
