Acknowledgement

My utmost gratitude goes to my thesis supervisor, Dr. Vegesna Radha for allowing me to join her group, for her skillful expertise, kindness, and most of all, for her patience. She was a perfect mentor, always there to patiently listen and to give valuable advice. I believe that one of the main gains of this 5-years program was working with Radha — gaining her trust and credence as well as the great learning experience I had. I wouldn’t have performed this work without her consistent encouragement and support. I have tried to imbibe a lot from her skills, though I don’t know how far I am successful in doing so. I thank her for believing in me, giving me an independent work-atmosphere, making me realize my strengths and abilities, and above all, her thoughtful perceptions and insight, which helped in bringing this work to such a good shape. Thanks Ma’am!

My thanks and appreciation goes to my thesis co-supervisor Dr. Ghanshyam Swarup. His critical analysis, apt troubleshooting, valuable suggestions and strict scrutiny during lab meetings helped a lot in improving the researcher in me.

A special thanks goes to Dr. Veena Parnaik, whose thoughtful and valuable suggestions during Cell Biology Group-meetings helped me a lot in trouble-shooting and covering the loopholes in my story.

I am greatly indebted to Nandini Rangaraj for not only teaching me confocal microscopy but also for being there for me throughout my PhD life, always eager to extend any sort of help whenever I got stuck with any sort of intricacies of microscopy or imaging. Thanks Nandini, this entire work would not have been possible without your support and co-operation!

My experience in GS/VR lab was a very interesting one. I thank Vijay, Kaushlendra, Rajanna, Subhash and Madhavilatha for their guidance at the beginning of my PhD. After that it was a roller-coaster ride for five years with experiences of all sorts, some sweet, some sour, all of which taught me something or the other and made me grow. I thank all past and present lab members — Vijay, Subhash, Subhashini (for their guidance), Preeti (her constant inspiration and motivation made me pull up my socks and continue striving towards perfection), Madhavilatha (for being an interesting company and helping me chill out during stress, and also for proof-reading my thesis!), Nagabhushana (his prompt suggestions during desperate times were really useful), Yatender (for always being there to extend any sort of help), Madhavi (for her constant support, motivation and encouragement), Vipul (I learnt a lot from you), Kunal (for trying to help in many ways and at the same time making me develop a sense of imperturbability and fortitude!), Kapil (the magic man, “eveready” to lend assistance in any ways), Megha (for finding my cell phone when I happened to misplace it), Shashi (for tolerating and believing in me), Kalai (the calmest of all, with a subtle smile), Senthil (for being a great company and for occasional stimulation of my grey matter), Asha (her sweet smile each morning kept me enlightened throughout the day), Nishant (for the carol...!) and Arti (for helping me while making the fusion protein constructs). I must thank Sudhakar Sir for helping me trouble shoot many of my experiments. The Lab folks’ support and readiness to help made my work so much smoother, thank you. I also thank Ganeshan and Laxamma for providing sparkling clean autoclaved glassware.
I sincerely thank all past and present members of VKP lab (both E209 and E213!) for their extended co-operation — Maithreyee, Kaushlendera, Ritika, Pankaj, Kirti, Fatima, Naireen, Poonam, Thanu and Murli. Timely help from Pankaj and Kirti was very useful. Fatima and Kirti had been a great company to have a chat with.

What would my life in CCMB have been without good friends! I must say I had been lucky to have quite a few, whose support and company had made my stay in CCMB a pleasant one. I sincerely thank Vijay, Sourav, Anoop, Pankaj, Poornima, Ramesh, Anurag, Narendra, Kirti, Priyanka, Nitin and Amit-da for their help during various phases of my PhD. A very special thanks goes to Amit-da and Pankaj for taking special care of me during my leg injury — I can never repay this debt! The "Rock-walk" excursions with Amit-da, Sumit, Pallavi, Praveen and Sourav served as an exciting mode of chill-out and detour from the daily monotony. I thank Nidhi and Jayendra for being excellent neighbours; I cherish the time spent with them on occasional Sundays.

I thank all of my batchmates whose dynamic company made the coursework interesting. I thank my DR3 roommates whose support made the beginning of the PhD a very pleasant one.

I thank the present and the past directors of CCMB — Dr. Ch Mohan Rao and Dr. Lalji Singh for providing excellent state of art facilities in the campus.

I take the pleasure to thank all the members of the Tissue Culture facility for their diligent work towards the maintenance of this excellent facility. All this work wouldn't have been possible without their co-operation.

I thank the members of the Fine biochemicals section — our Kishore Joshi ji, Joseph and Hanuma Prasad for their co-operation in providing desired reagents.

I sincerely thank the members of advanced microscopy section — Ravi Chakravarthi and Shyam Kumar for their support and troubleshooting. I specially thank Giridharan and Nageshwara Rao of Digital Imaging facility for their extended help and support in scanning of photographs and printing of thesis. I thank the members of the photography section Ramesh, Rahman and Khalid for their help in taking gel photographs.

I thank the members of the Proteomics lab for their co-operation — especially Rakesh, Ravinder and also Vijay, although that part of the work did not make its way into this thesis.

Financial assistance from CSIR and VR is acknowledged.

Above all, I thank my wife, my greatest friend, who had stood beside me, encouraged me constantly. I will forever remain indebted to her for the sacrifices she made and more importantly, for bringing out the better person in me.

I thank my father for believing in me and for being there when I needed. My thanks to my in-laws, for giving me happiness and joy, and for their continuous support and interest in what I do.

Finally, I would like to thank my mother, who I believe is constantly watching me, whose love is boundless and without whose blessings I would not have been what I am today.

—Aninda
