ACKNOWLEDGEMENTS

Any research endeavour, leading to the degree of Ph. D. demands hardwork, leisure and patience. Even though it is the job of an individual, it can be completed only by getting encouragement assistance and guidance from so many persons. This is an occasion not only to remember but also to acknowledge the help received from all those who have been with me during this arduous endeavour.

At the outset, I wish to express my immense sense of gratitude to my guide Prof. R. Chittaranjan without whose guidance and scholastic support, the completion of this thesis would have been impossible. It is my duty also to show my gratitude to my mother-in-law Mrs. Saraswatibai Sharad Tidke and my husband Shishir Sharad Tidke and my son Shahaji for their constant support of all kinds and shades. They spared me ample time for this work, even though it was very inconvenient for them. I cannot forget the affection and the constant attention extended to me by Mrs. R. Kamal and I must, without fail, express my gratitude to her. I shall be failing in my duty if I don’t remember the help rendered by my sister and brother-in-law Mrs. and Mr. Gunwantrao Wadatkar for their initiative and moral support.

I wish to express my thanks to all my friends, colleagues and well-wishers for their constant assistance and counsel.
