Acknowledgements

It gives me immense pleasure to acknowledge my indebtedness, sincere gratefulness and profound sense of gratitude to those without whom this thesis would not have been possible.

First and foremost, it gives me profound pleasure to put on record my heart-felt gratitude to my esteemed supervisor, Dr. Tarsem Singh Gill, Professor, Department of Physics, Guru Nanak Dev University, Amritsar for not only guiding me with his experience and knowledge but also for providing a very informal and relaxed environment. I am deeply indebted to him for his sagacious suggestions, constructive and healthy criticism, unswerving patience and perpetual encouragement that I have been perceiving throughout the course of present research work. It was indeed a great experience to work under his scholarly guidance and supervision.

I take this opportunity to express my sincere gratitude to my esteemed co-supervisor, Dr. Nareshpal Singh Saini, Reader, Department of Physics, Guru Nanak Dev University, Amritsar for his competent supervision and advises, made this difficult task a very pleasant and memorable one. I am really grateful to him for timely help and sparing so much time to read critically my entire thesis to bring this into the present form.

My sincere thanks are due to Dr. Harvinder Kaur, Head, Department of Physics, Khalsa College, Amritsar for her constant encouragement and illuminating discussions that I have had with her. The reminiscence of our day long discussions during the early phase of this work are fondly remembered.
I am also highly obliged to Prof. B. S. Bajwa, Head, Department of Physics, Guru Nanak Dev University, Amritsar for providing full cooperation during the entire work. I would also like to thank library staff and all faculty members specifically Dr. R. C. Singh, Dr. Lakhwant Singh and Dr. Kuldeep Singh for helping me out at the time of need.

It is my privilege to gratefully acknowledge Prof. P. K. Shukla, Germany for his valuable and inspiring advises during the study of present research work. The facilities used at ICTP, Trieste, Italy are highly acknowledged where some part of research work was completed. It is a great pleasure to thank Dr. I. Kourakis, Queen’s University Belfast, UK for his constant encouragement and fruitful suggestions. I most appreciatively acknowledge the help of Dr. A. P. Misra, Kolkata in the last few months.

I am extremely thankful to Department of Science and Technology (DST), New Delhi, India for providing me fellowship to carry out this research work.

My acknowledgment would be incomplete if I do not mention the unconditional support of plasma group members Dr. Parveen Bala, Chanchal Khullar, Balwinder Singh Chahal, Ranju Mahajan, Ravinder Kaur and Sandeep Kaur for their ever willing co-operation and moral support. The love and support that I got from them have no comparison.

It is high time to acknowledge my friends Dr. Kavaljeet Singh Samra, Vishal Arora, Sukhwinder Brar and Sarbjeet Singh for their valuable feedback and help during the high and low times of all these years. My special thanks are due to Mrs. and Mr. Surjit S. Sandhu for their love, encouragement and patience during the odyssey to get me to the right path for achieving success. I do not have words enough to honor my parents whose constant encouragement and moral support has always been there without which it would not have been possible to carry out this research work.
