In the Name of God, Most Gracious, Most Merciful

Acknowledgements

In the course of this journey to attain PhD degree, I would like to acknowledge people who have contributed in success of this voyage. The first and foremost I would to like to thank almighty God who has given me strength, perseverance and scientific temper to perform this enduring task. My parents and family members who always supported me, believed in my abilities and waited long for this moment. I would like to dedicate this thesis to them.

In terms of scientific credit, the first person whom I would like to formally thank is my boss, Dr. Kaliannan Ganesan, who has given me an opportunity to work in his lab. He has not only given me the freedom of independent thinking but actually built in me the scientific attitude to analyze, theorize and deliver thoughts in terms of both writing and verbal presentation. I will always respect his helping nature and generosity towards other fellows. My association with him also taught me to appreciate the values of patience, perseverance and sustained tolerance.

I became part of IMTECH family in summer of 03 and I would like to extend my sincere thanks to former director Dr. Amit Gosh and present director IMTECH, Dr. Girish Sahani for providing an excellent facility and atmosphere in the Institute. I saw remarkable changes since I joined, whether it is recruitment of new faculties, students, man power or sophistication of central instrumentation facility in the Institute.

The fellowship from CSIR is duly acknowledged, as nothing in this world comes free, and it has actually financed my livelihood and stay in this Institute. Many chemicals, my scientific trip to Ahmadabad, Chennai, Pune and Edinburg and even cost incurred in this thesis is all from the contingency grant provided by CSIR.

I am thankful to Dr. Anand Bachhawat, who has always actuated me and given scientific suggestions during the initial lab meetings we used to share with his lab. I appreciate his enthusiasm, lab management and the way he deals with his students. I am thankful to Dr. JagMohan Singh for his support and concern for my career. I would like to pay special regards to Dr. Alok Mondal who always inspired me with his jovial nature, and motivated me in terms of scientific temperament. I am thankful for his concerted effort for my salary when I was
void of CSIR fellowship. Dr. Pradip Chakaroborty who happens to be our ‘JNU PhD coordinator’ also helped me in performing real time PCR experiments and I greatly acknowledge his help. Dr. Shekhar Majumdar as ‘Radiation Safety Officer’ took special care for timely distribution and disposal of radioactive materials. I am also thankful to friendly nature of Dr. Javed Agrewala, Dr. Ashish Ganguly, Mrs. Nandita Bachhawat, Mrs. Thunga and Mrs. Indrani madam.

Many people have helped me in completing this thesis, the first and foremost person to whom I would like to acknowledge is Kamlesh. Being my best friend, he always propelled me and inspired me with his positive thoughts; he has been a nice buddy and helped me whenever and wherever I needed him. Manish and Sanjeev with whom I shared initial part of my stay; the discussion we used to have on every Saturday night will be remembered. Suhail a nice buddy, who came into later part of my tenure in IMTECH, taught me so many small things whether it is new meanings of life or scientific concepts. I am really indebted to these people.

In my lab, I would like to thank Rekha who initially taught and acquainted me with lab techniques. This thesis is actually founded on her findings and I simply carried forward her work. Dearest Sanjoy who was very happy when I joined the lab was always helpful in terms of scientific discussion and motivation; I don’t know where I would have landed without his emotional support, he made me believe in my thoughts and hypotheses. I am thankful to my juniors Sushma and Yashpal from bottom of my heart for helping throughout my Ph.D. work. Both of them always listened to me and we had fruitful discussion whether it was related to science or small meanings of lives. I owe them for maintaining a peaceful and congenial lab atmosphere. I wish both of them all the success in their scientific and personal life. Friends like Hardeep, Akhilesh are special and close to my heart. The presence of Awani, Jaspreet and Surjeet makes a lively atmosphere and our lab is incomplete without their presence. I often remember the lively bubbly company shared with Pallavi. I am thankful to Dr. Anand’s, Dr. Alok’s and Dr. JagMohan Singh’s lab people with whom we shared so many lab events, keys, instruments and chemicals. It is really a huge list but I thought I should mention some names (Hemant, Jagpreet, Balveer, Udita, Poonam, Neeraj, Jaspreet, Diya, Anu, Neha, Amit, Anil, Randeep, Rajkumarji) and I would like to give them a big ‘Thanks’.

Our batchmates, “I often remember how initially we have changed the attitude and mind-sets of people in the Institute and hostel”. The first year birthday parties, course work, trip to Shimla, Dharamshala all are life’s finest
moments. Some special names (Pandey, Joshi-Shilpi, Sankalp, Kamna, Pooja, Shekhar, Vijay, Loveena, Ashok and Jaspreeet) of whom I cherish fond memories.

I can never forget Rohan pahji, his effort in radioisotope distribution and later Mahesh, Deepak for running sequencing samples, Ashu and Ashok for fluorescence microscopy, Manzoor and Sheveta for FACS experiments. I am thankful to all my seniors (Vibhu, Chitranshu, Murthy, Anuradha, Arshad, Rahul) and juniors (Anuj, Akesh, Lomay, Mohan, Swati, Richa, Alpana, Mirage, Pankaj). I apologize for not mentioning the names of each and every person who have helped me and contributed here and there in fulfillment of this dissertation, the list being too long to cut short.

The people from Chaap committee, the company in which I used to take religious shelter and peace of mind will always be remembered (Suhail, Firoz, Mamoon, Rehman, Aslam, Manzoor, Haider, Fazal, Zeya, Arsheed, Arshad, Shaabir). Words like “माशाह-अल्लाह, सुबहान-अल्लाह, अल्लाहु-अल्लाह हमेशा याद रहेगा”.

I would also like to take this opportunity to thank all the library staffs for books, journals which kept me updated, the BIC staff for internet facility, especially Dr. Raghava for his management, Purchase section, Stores people and Administrative staff who always cleared my bills on time and especially Mrs. Batra and Mrs. Gupta for their kind help.

I am thankful to all the hostel inmates, the members of our mess family, staff of IMTECH canteen for providing me food and beverages and kept me healthy to perform experiments in the lab. Last but not the least I would like to thank all the staff members who has made IMTECH campus a nice place to work.

Date: July 2009
