Acknowledgement

Early in the process of completing this project, it became quite clear to me that a researcher cannot complete a Ph.D. thesis alone. The evidence provided here is clearly the result of teamwork rather than being the accomplishment of a single person.

The first and foremost I would like to thank almighty God who has given me strength, perseverance and more importantly always good people around me which has made it easy to perform this enduring task.

I would like to gratefully acknowledge the enthusiastic supervision of Dr. G. C. Varshney during this work. He has been a significant presence in my life. His ability to probe beneath the text is a true gift, and his insights have strengthened this study significantly. I will always be thankful for his wisdom, knowledge, and deep concern. I offer my gratitude and appreciation to him, for the right ways in which you lovingly challenged and supported me throughout the whole of this work - knowing when to push and when to let up. My advisor, for his hard work and guidance throughout this entire thesis process and for believing in my abilities. Lot of thanks to Mrs Veenu Varshney, for her care and love during the span.

I also owe my gratitude to Dr Ganesan, you inspired my research, which, I guess, is normal. But in addition to that, you also personally inspired me by the interesting discussions and way of troubleshooting the things. He has helped me in developing the thinking ability. I am always indebted to him for his helping nature and generosity towards other fellows.

I became part of IMTECH family in summer of 04 and I would like to extend my sincere thanks to former director Dr. Amit Gosh and present director IMTECH, Dr. Girish Sahni for providing an excellent facility and atmosphere in the Institute. I saw remarkable changes, whether it is recruitment of new faculties, students, man power or sophistication of central instrumentation facility.

I offer my heartfelt thanks to Dr. P. Sen, Dr. P. Guptaarma, Dr. G. P. S. Raghava, Dr. S. Majumdar, Dr. D. Sarkar, Dr. R. Kishore, Dr. J. N. Agrewala and Dr. Manoj Raje, for their constant words of encouragement, fruitful discussions and help rendered on numerous occasions. The kind help Dr. P. Guptaarma in molecular biology work and Dr. G. P. S. Raghava in bioinformatics work deserves a special mention.

Lab mates are always important, especially if you spend most of the time in the Institute. In my lab, first of all, I would like to thank Dr Sukhwinder who initially taught and acquainted me with lab techniques. Her way of thinking and criticizing the things has always been useful in carrying my work ahead. Thanks a lot Dr! Here unforgettable is the time I spend with Dr Vandana who is my senior cum friend and philosopher. She was my anti depressant drug! Which comes free for me whenever I want. I heartily thank her for being with me when I needed her. Dr Ajit needs to be thanked for his great sense of humor which has always kept the atmosphere of the lab alive. I take this opportunity to thank him for their co-operation and valuable advice during the entire span of study. Shilpy has always believed on my abilities which have forced me to go ahead.

Special thanks to all my juniors for creating a very good atmosphere in the lab and particularly for reading and re-reading my thesis drafts. Thanks Surinder for giving lot of time for lots of help in thesis formatting which was otherwise very difficult to do in so less time. Also for good scientific and personnel discussions during tea time. Deepshikha was always there for me in the times when I was almost defeated. Thanks a lot dear for so much support! Starting a day of work is just more fun if you can start with a nice chit-chat of Puja. Thanks for that.

My juniors Shailendra, Abhijeet, Rakesh, Brij and Sahil have always been very caring and supportive for me. Shailendra, thanks a lot for bearing my lots of frustration and giving good company as neighbor. Smiling face of smarty Abhijeet has always made the lab environment cool and relaxed. Special thanks to Rakesh for helping me in final experiments which was otherwise impossible for me to carry out independently when I was in dual phase of thesis writing and bench work. I owe my loving thanks to Brij
who make little funs and give the reason to laugh. Thanks Sahil for lots of khane ki cheejein which have helped me to stay in lab without having dinner in thesis time. Thanks a lot dear and wish u all the best for your future stay in IMTECH. Million thanks are due to Raj Kumariji, Selvanji and Manjit for their expert technical help and all-round general assistance.

I shall always remember the cheerful support of my batchmates, Robin, Arvind, Dr. Divya, Rachna, Sushma, Archana, Iomary, Haider, Manish, Swati, Netrapal, Nigam, Dr. Manzoor, Mitesh, and not only during the Pre-PhD course but also during the successive years. Robin and Arvind need a special mention as they were always there for either academic or personal consultation.

I have been fortunate to come across many funny & good friends, without whom life would be bleak. Richa has played an important role in my life as a PhD-student. I have benefited immensely from her cooperation. Richa, you are not only a wonderful friend and travelling companion, you are and will always be very close to my heart. Special thanks go to Dr. Snehlata for her ever-present support and for making me laugh as often and as loudly as she has. Sneha and Dr. Kamlesh have always been very important in my stay in IMTECH. Their positive criticism and well wishes have changed form what I was. Thanks a lot to both of you! I would like to extend my thanks to Shweta, Vijender, Mahesh, Akhilesh, Sandeep, Payal, Hemant, Gautam, Vinod, Swati, Eshu, Dr. Neetu, Alpana and Shrijita for helping me in way or the other. Help from Deepak in sequencing work, confocal microscopy and Shweta in flow cytometry is greatly appreciated.

Million thanks to Sawita didi, jijoo, Sumit and Pulkit who made sure that I never felt homesick. It was such a comfort that I had a home to walk in to, any time of the day to have good food, and to sleep like crazy!

This thesis is the result of my mother’s sacrifice throughout the life. I remember my mother’s prayers and they have always followed me. They have clung to me all my life. After a lot of struggles, she has raised me, to be the person I am today. “Mummy” you have been with me every step of the way, through good times and bad, you have actively supported me in my determination to find and realize my potential.

To my ‘choti ma’ (mami ji) who continues to learn, grow and develop and who has been a source of encouragement and inspiration to me throughout my life. And also for the myriad of ways in which, throughout my life, you have always helping me to succeed and instilling in me the confidence that I am capable of doing anything I put my mind to. Thank you for all the unconditional love, guidance, and support. Thank you for everything. I love you! My Mamaji who is more than my father has always showered lots of blessings and support from childhood. Thanks a lot for giving me such a good family where love matters more than any thing. My brothers, Naveen and Neeraj, for their love and support throughout the years. Thank you for the laughing and the fighting, and everything in between.

What’s the good of news if you haven’t a sister to share it? This is for my ministering angel Payal and for the ever loving di, Puja. Thanks for helping me smile through my crabbliest phases, for knowing from my voice that I had something to talk about, and just being for the best sister ever, a big hug for bhabhi who so effortlessly became a part of our family and our life that she is more a sister, than a bhabhi. For Aryan who inspite of being so small, is such a huge pleasure.

Million thanks to Dipak, my best friend, my soulmate and life partner. Thank you for your unconditional love, the constant encouragement, for believing in me and forgiving the reason to have hope in so many things particularly when I was struck with lots of crappy things. Thanks for being YOU! Thanks for being such an important presence in my life and for always being on the other end of line (Thanks Tata indicom!). For my in laws, for lots of warmth and love. Thanks Alka for your smile on phone which used to release my tensions and stress.

I truly acknowledge the help provided by the staff at the Central Animal Facility of the Institute in sustaining my ever-increasing demands for experimental animals. The helpful attitude of Dr. Neeraj Khatri
and Mr. Bawa, irrespective of the time I approached them with requests for animal issuance, needs a special mention. Help rendered by Vinodji and others are duly appreciated.

The staff at the Bioinformatics Center and the Library deserves a special mention for all the help rendered at the hour of need.

My sincere thanks to Fortis blood bank and its staff for their kind support of providing human blood used in Plasmodium culture. It was not possible to carry out my work without it. Thanks a lot sir!

I am thankful to all the hostel inmates, the members of our mess family, staff of IMTECH canteen for providing me food and beverages and kept me healthy to perform experiments in the lab. Last but not the least I would like to thank all the staff members who has made IMTECH campus a nice place to work.

Finally, I would like to extend my thanks to everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

The fellowship from CSIR is duly acknowledged, as nothing in this world comes free, and it has actually financed my livelihood and stay in the Institute.

Date: Nov, 2009

Place: IMTECH, Chandigarh
