ACKNOWLEDGEMENTS

Real life isn’t always going to be perfect or go our way, but the acknowledgement of what is working in our lives can help us not only to survive but surmount our difficulties."

The process of Ph.D is a long journey during which you come across so many people who walk with you or support you to go through this period. By this part of my thesis, it is my turn to show gratitude to all those who have stood by me in the successful completion of this work.

My first, and most earnest, acknowledgment must go to my guide and my mentor Prof. Rajendra Prasad. I would like to thank him, for having led me into a fascinating area of research, for his uncanny ability to tell a good story and for teaching me that anything that does not kill you, makes you stronger. I appreciate all his contributions of time, ideas, and funding to make my Ph.D. experience productive and stimulating. The joy and enthusiasm he has for research was contagious and motivational for me, even during tough times in the Ph.D. I am greatly indebted to him for helping me to overcome obstacles in the process of conducting the research. In every sense, none of this work would have been possible without him. I have been fortunate as I have gained much more out of this association than I had ever anticipated. Thank you Sir for everything ...

Vibha Ma’am will always be remembered for all the warmth that she holds and cute Mohit for his brilliant shots in cricket. I will cherish the memories of the parties at sir’s home.

With deep sense of gratitude, I owe sincere thanks to Dr. Andrew Lynn who was actively involved in my work. I thank him for providing me guidance and space to work in his lab at School of Information Technology (SIT), JNU. His knowledge in the field of bioinformatics is charismatic and was really helpful for my research work.

I am greatly indebted to the past and present Dean of School of Life Sciences (SLS) for providing me excellent facilities at the school.

Special thanks goes to the Council for Scientific and Industrial Research (CSIR), India for providing fellowship (JRF and SRF) and other monetary assistance in the form of travel grant and contingency, which made it possible for me to carry out this work.
I would like to acknowledge the assistance of Mr. B.A. Khan, Mr. A.C. Alexander, Mr. S.P. Sharma, Mr. S. K. Mishra, Rajendra, Aslam, and Faiz of the Central Instrument Facility, SLS. Meenu Ma'am would always be remembered for all the sweetness and her untiring efforts in handling the administrative affairs at SLS. A special mention must go to Ms. Pratima and Mr. Shankar for their constant help with office affairs at 101; they are simply inseparable from the research that I carried out.

I would also like to mention the names of the past and present technical staff in 101, Tikjal, Gagan, Yadavji, Sharmaji, Vijay, Surendra, Vijendra, Karnvirji and Ramesh who assisted me with their unsung efforts and timely support in carrying out various tasks important for laboratory maintenance and assistance.

Far too many people to mention individually have assisted me in so many ways during my work at JNU. These include my seniors, colleagues and my juniors and my sincere thanks to all of them. Few people would need a special mention. I wish to thank my senior Preeti who taught me basics of everything that I know today. I would like to thank Sudhanshu, DB, Hina and Ashutosh for being my co-workers and more so my buddies. Their support, encouragement, and companionship turned my journey into a pleasure. The memories of nights spent at Ganga Dhaba along with a cup of tea will always be cherished. Many a times their cool attitude helped me to come out of tough situations. Thanks a lot guys for being such good friends.

I will always treasure the great time spent with my batchmates Shiteshu, Shivesh, Anupam, Anita, Rashmi, Tara and many more whom I might have inadvertently forgotten to mention. The trip to Vaishno Devi and all the fun we had will always be remembered. I will also thank my friends in SIT who were always jovial irrespective of the conditions. I was always welcome to their lab. Rehan, my bioinformatics friend deserves a special mention, without whom, my work would not have moved ahead. Thanks for the efforts and ideas.

The track of my Ph.D has been really tough both personally as well as professionally. There are few people who deserve a very special mention and I not only owe my thanks to them, rather, I owe my life to them. Naveen, Shuchin, Deepak, Suhail and Naseem, thanks for always being there, anywhere and everywhere, anytime and everytime. Your strong support has helped me come out of the roughest patches of my life. I will never ever forget all the efforts put in, just to make me smile. I would not have been able to survive without you guys. This section can't be complete
without mentioning my cute and sweet friend Kunal. His happy-go-lucky nature and enthusiasm at the fag end of my Ph.D, when one is low on energy and will-power, he was the one who gave the final booster to finish this work with a positive attitude. Thanks.

I treasure great memories of JNU, its dhabas, nearby movie halls; all the fests in JNU but all these fun-filled moments of JNU are incomplete without the mention of my best pal of all times, Soraya. Whether it was sharing happy moments of research or bitching about people she was the one who lend me all ears. Our trips to all silliest places on ma bike and doing all nonsense made this whole experience a light-hearted one. Hey buddy, you hold a special place in my heart.

A penultimate and most heartfelt thank-you goes to my wonderful parents and my brother Ruchir. For always being there when I needed them most, and never once complaining about how infrequently I visit, they deserve far more credit than I can ever give them. The silliest solutions by my cutie bro were a constant source of inspiration to look for solution to every problem during the course of the journey. Mumma, my pillar of strength, you would have been the happiest person to see this moment. Miss you always...

My final acknowledgment must go to Almighty God who put me to all tests in these years of my Ph.D and gave me mental strength to wade through this period with courage.
