Abbreviations and symbols used in the text i
Abstract ii

Chapter I
Introduction

Chapter II
Review of literature
2.1. Background
2.2. Malaria, life cycle of Plasmodium and its treatment
  2.2.1. Treatment and complications of tissue schizonticides
2.3. Role of liver in drug metabolism and toxicity
  2.3.1. Drug-induced acute liver failure
2.4. Mechanisms of hepatotoxicity
2.5. Model hepatotoxicants used in toxicology studies
  2.5.1. Hepatotoxicity of APAP
  2.5.2. Hepatotoxicity of CCl₄
2.6. Advancements in toxicology research
  2.6.1. Gene expression analysis and toxicology
2.7. An overview of toxicogenomics
  2.7.1. cDNA microarray: A powerful tool for transcript analysis
  2.7.2. Toxicogenomics in drug development, risk assessment and class prediction
  2.7.3. Toxicogenomics, biological pathways and systems toxicology
2.8. Assessment of hepatotoxic liabilities of 8-aminoquinolines by transcript profiling

Chapter III
Materials and methods
3.1. Animal species and acclimation
3.2. Drug administration and tissue collection
3.3. Serum biochemistry
3.4. Histopathology
3.5. Chromosomal aberration assay
3.6. 15k and 22.4k mouse cDNA arrays
3.7. Preparation of Chlorophyll synthetase of Arabidopsis thaliana as positive control spike
  3.7.1. Preparation of competent cells
  3.7.2. Transformation with pARAB and efficiency check
  3.7.3. Plasmid DNA isolation
  3.7.4. pARAB linearization and gel extraction
  3.7.5. In vitro transcription and purification of positive spike RNA
3.8. RNA isolation and quality assessment
3.9. cDNA labeling and purification
3.10. Hybridization, scanning and image analysis
3.11. Microarray data analysis
3.12. Pathway analysis, functional characterization and in-silico validation
3.13. Real Time PCR analysis
Chapter IV

Results

4.1. Activity of ALT and AST enzymes
4.2. Histological evaluation of hepatic tissue
4.3. Chromosomal aberrations
4.4. The positive spike RNA
4.5. Gene expression analysis
4.6. Clustering analysis
4.7. Pathway analysis
4.8. qRT-PCR analysis

Chapter V

Discussions

Chapter VI

Summary
